

WATER OR SEWER SERVICE PERMIT

The following diagram depicts the typical steps necessary to acquire a new service permit

¹ Flow test procedures can be found on [DWSD Request a Permit](#)

² Engineering plans and applicable attachments shall be submitted to DWSD through the online form at [DWSD Request a Permit](#)

³ Service Permit Application and associated documents can be found on [DWSD Request a Permit](#)

⁴ No service line installation work to be undertaken prior to notifying DWSD's inspector as per Permit terms & conditions. Call for inspection 7 business days in advance at (313) 267-8092

⁵ The Master Plumber shall call DWSD's Permit Unit (313) 267-8000 a minimum of 5 days prior to the date internal plumbing is ready for water meter installation to schedule an appointment. This step only pertains to the Water Service Tap Permit Process.
