Hi Benjamin,

Thank you for your advice. I will go ahead and add pictures to the application for the suggested windows and the rotting window frames. Please put me in for the November meeting.

However, I do want to mention I feel that my biggest issue wouldn't be a simple fix. All but one window in my house will not open. This worries me a lot in the case of a fire. These windows are heavy metal, you can't simply break out the glass and get out. I want to put the safety of my family above everything, and believe this is the most pressing issue with getting these changes done. Is there a way to highlight this on the application?

Thank you for your time and help.

Liz

Good morning,

Historic District Commission Staff had a chance to review the application for the window replacement project at 14894 Greenview. Staff does not have the authority to approve this application, and it will need to be heard at a monthly commission meeting. Unfortunately the agenda for the October Meeting is now finalized, and the next available meeting is November 9th.

In order to have a more complete application, the Commission would want to see examples (photographs, catalog cutsheets, product drawings from the manufacturer, etc) of the proposed replacement windows.

As a bit of advice, I will say that the Commissioners prefer to rehabilitate existing windows
