---

HDC,

My name is Lee Ehlers and I would like to replace the second and third floor windows in the house at 4325 Fullerton (the main floor windows are original so they will not be replaced). The current windows on the upper floors are vinyl were are in violation of HDC rules so I was told to replace them with wood. This is what I'm trying to do.

I've attached all the information I was able to gather and the window company I'm proposing to use would like you to know the following:

1. Any brickmold that is present will be left as is, and if not present will we replace with like material.
    a. The windows quoted are full frame wood in/out
    b. Our recommendation (we have done many in historic neighborhoods in Detroit) is to do a wood/clad insert which will preserve the brickmold. The exterior cladding is added over the wood and will add many years to the life of the window.
    c. The windows will be installed with the same exterior indentation that exists now.

Let me know if there is any additional information you need me to provide you.
