

HIV Risk Assessment

If your patient answers “yes” to any of these questions, they may benefit from PrEP –

- Do you use condoms sometimes or not at all?
- Do you “bottom” without a condom?
- Is your partner(s) HIV-positive or an unknown status?
- Have you been on PEP recently?
- Have you had a recent STD?
- Are you trying to get pregnant with an HIV-positive partner?
- Do you/your partner(s) use or inject drugs?
- Do you/your partner(s) exchange sex for money, housing, drugs or other needs?
- Have you been threatened or forced to have sex against your will?

**Let's talk
about PrEP!**
