The explosion of styles in the High and Late Victorian periods required a deeper palette of colors to unify the diverse elements of these designs and to highlight the variety of materials and textures used by Detroit's architects and builders. At the same time, paint manufacturers such as the Acme White Lead Works in Detroit and other national firms with a strong market in the region, such as the Sherwin Williams Company, developed ready-mixed paints in resealable cans in every-richer and darker colors. Deep olives, browns, and greens in a wide variety of shades became readily available for the first time. While the light colors of the mid-century were manufactured throughout the High and Late Victorian periods (and consequently could, historically, be used on the later styles), the lighter colors were generally used on simple frame buildings. The more imposing High and Late Victorian structures, especially when erected of brick or stone, require the darker colors to bring out their best features, particularly the window frames and sash which almost universally were painted darker than the main body color to make the windows appear to recede into the facade.

The trim color for masonry buildings of this period should always be selected with the color of the brick or stone in mind. Because the natural materials have already determined the overall body color of the house - red, brown, or yellow brick, green or gray stone, for example - the trim color should tend towards the earth tones: browns, yellows, greens, olives, and grays. Modern pastels, especially pale yellows, blues, and pinks, simply are historically incorrect. Occasionally black was suggested as a sash color to provide contrast to one of the browns or greens used for the window frames. This was a logical consequence of trimming a brick or stone building in a color darker than the masonry and then seeking an even darker color for the sash.

If the structure has stone detailing (above windows and doors, for example) it would be appropriate to paint the cornice or porch a color that matches the stone, selecting a darker color for the window frames and sash. If the structure has iron crestings, railings, or brackets they should be painted black, dark brown, or green. Often such details were painted to look like weathered bronze.

Shingle Style houses or those with shingles in the gables pose a special problem. Normally it was recommended that these surfaces be stained, although most surviving examples have long since been painted. The colors of this stain (or, if repainting, the paint) should follow the colors given, with the darker greens, olives, browns and yellows (in that order) being the most popular.

COLOR SYSTEM B

ACCEPTABLE COLOR COMBINATIONS *MS = MUNSELL STANDARD

BODY	TRIM	SASH	CORNICE/ PORCH	IRON CRESTING
Any System B Color EXCEPT A:7, A:8, A:9, B:19	Any System B Color	Match trim color or A:9, B:12, B:18, B:19	Match trim color or stone detailing	A:8, B:8, B:11 or B:19
Shingles: Stained or painted any System B Color ESPECIALLY Dark Greens, Olives, Browns and Yellows EXCEPT A:7, A:8, B:19	Any System B Color	Match trim color or A:9, B:12, B:18, B:19	Match trim color or stone detailing	A:8, B:8, B:11 or B:19
Existing brick or stone	Any System B Color darker than the brick or stone body, ESPECIALLY B:6, B:8, B:11, B:18	Match trim color or A:9, B:12, B:18, B:19	Match trim color or stone detailing	A:8, B:8, B:11 or B:19
