# INTRODUCTION

---

## Organization Description

The Detroit Department of Transportation (DDOT) provides service in the City of Detroit and destinations beyond the city limits in Wayne and Oakland counties. All fixed-route service is operated in-house. DDOT's Detroit MetroLift paratransit service is provided by a contractor, Transdev, and subcontractors: Detroit Checker Cab Company, Comfort and Care Transportation, Delray United, Lakeside Division Inc., Moe Transportation, Odyssey Transportation, People's Transit, and Wrightway Transportation. Paratransit trips are scheduled by Transdev staff. DDOT's service area population is 679,865.

DDOT directly operates a network of 43 fixed routes with a fleet of 288 Federal Transit Administration (FTA)-funded buses. The current peak requirement is 231 vehicles. Detroit MetroLift paratransit service is operated using contractor-owned equipment. No FTA-funded equipment is used in MetroLift service. Both fixed-route and paratransit service are operated 24 hours a day.

On May 1, 2019, DDOT implemented a new fare structure named Dart. The basic adult fare for DDOT service is \$2 for 4-hour unlimited rides on DDOT, SMART, and QLINE. The reduced fare is 50 cents for senior citizens, persons with disabilities, Medicare cardholders, and students. Students who have a DDOT identification card or a school issued identification card can ride at the reduced fare rate during all hours of service. In July 2019, DDOT implemented the Dart App, a mobile fare payment system using smartphone technology.

DDOT operates five (5) administrative, operations, and maintenance facilities, a transit center, and a transit hub as noted below. All facilities contain FTA interest.

ADMINISTRATIVE, OPERATIONS, AND MAINTENANCE	
Main Administrative Office	100 Mack, Detroit, MI 48201
Central Heavy Repair Building	1301 E. Warren, Detroit, MI 48207
Gilbert Garage (Bus Operations and Maintenance)	5600 Wabash, Detroit, MI 48208
Coolidge Garage (Currently not in service)	14044 Schaefer, Detroit, MI 48208
Shoemaker Garage (Bus Operations and Maintenance)	5149 St. Jean, Detroit, MI 48213
TRANSIT CENTER	
Rosa Parks Transit Center	360 Michigan, Detroit, MI 48226
TRANSIT HUB	
State Fair Transfer Hub	20110 Woodward, Detroit, MI 48203

## Title VI Policy Statement

It is the policy of the City of Detroit Department of Transportation (DDOT), in accordance with Title VI of the Civil Rights Act of 1964, DDOT's Title VI Compliance and Implementation Plan to assure that "no person shall, based on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subject to discrimination under any program or activity" for which DDOT receives federal financial assistance (42 U.S.C. Section 2000d). Furthermore, it is the policy of DDOT, as a recipient of federal-aid funding, to ensure nondiscrimination in all of its programs and activities.

To ensure compliance with Title VI of the Civil Rights Act of 1964, DDOT commits daily to promptly taking all measures necessary to ensure compliance with Title VI of the Civil Rights Act is upheld.

DDOT includes Title VI assurances in all written contracts and monitors for compliance when distributing federal aid funds to other entities. DDOT's Title VI Program Coordinator is responsible for initiating and monitoring Title VI activities, preparing required reports, and other DDOT responsibilities as required by Title 49 CFR Part 21.

Individuals with questions or requiring additional information relating to this policy or the implementation of DDOT's Title VI Program should contact the Office of Compliance Title VI Coordinator, Alicia Miller, at DDOT's Main Office located at 100 Mack, Detroit MI 48201; by telephone at (313) 833-3658; or by email at [DDOTTtitle6@detroitmi.gov](mailto:DDOTTtitle6@detroitmi.gov).

As the Executive Director of Transit, I am fully committed to the goals of achieving nondiscrimination for all beneficiaries and participants, contractors, and subrecipients.

---

C. Mikel Oglesby, Executive Director of Transit

## Title VI Notice to the Public & Location Where Title VI Notices are Posted

The Detroit Department of Transportation (DDOT) posts a “Know Your Rights” notice to the public of rights under Title VI at the following locations listed in Table 1 below. The “Know Your Rights” notices are also publicly displayed on revenue vehicles.

**TABLE 1 – PUBLIC NOTICE LOCATIONS**

LOCATION NAME	ADDRESS	CITY
Main Administration Office	100 Mack	Detroit
Central Heavy Repair Building	1301 East Warren	Detroit
Rosa Park Transit Center	360 Michigan Avenue	Detroit
Gilbert Garage	5600 Wabash	Detroit
Shoemaker Garage	5149 St. Jean	Detroit
Website	<a href="http://www.ridedetroittransit.com">www.ridedetroittransit.com</a> or <a href="http://www.detroitmi.gov/ddot">www.detroitmi.gov/ddot</a>	

DDOT’s Title VI notice are available on buses in English, Spanish, and Arabic (Figure 1). When DDOT’s outreach events and activities take place in geographic areas with known concentrations of French, Russian, Polish, Serbo-Croatian, Chinese, Vietnamese, African Languages, and other Slavic, Indic, Indo-European and unspecified languages that meet the “Safe Harbor” threshold, we will provide a Title VI notice translated in those languages as well.

وللمساعدة في الترجمة اتصل بمكتب خدمة الزبائن التابع لوزارة النقل في مدينة ديترويت على الرقم (313) 933-1300.

## Title VI Complaint Procedures

Any person who believes they have been subjected to discrimination based on race, color, or national origin may file a Title VI complaint by completing and submitting DDOT's Title VI Complaint Form to DDOT's Office of Compliance. A copy of the DDOT Title VI Complaint Form is shown in Figure 2 and is available on DDOT's website. DDOT investigates complaints received no more than 180 days after the alleged incident. DDOT will process complaints that are complete. Signed complaint forms may be filed in writing via U.S. mail to:

Detroit Department of Transportation  
Office of Compliance  
Attention: Title VI Coordinator  
100 Mack  
Detroit, MI 48201

Complaint forms may also be faxed to DDOT's Office of Compliance at (313) 833-1496.

Once the complaint is received, DDOT will review it to determine if DDOT has jurisdiction. The complainant will receive an acknowledgement letter informing him or her whether the complaint will be investigated by DDOT.

### **Investigation of Complaint**

DDOT has 60 days to investigate the complaint. If more information is needed to resolve the case, DDOT may contact the complainant. The complainant has 15 days from the date of the letter to send requested information to the investigator assigned to the complaint. If the investigator is not contacted by the complainant or does not receive the additional information within 15 days, DDOT may administratively close the complaint. A complaint can be administratively closed if the complainant no longer wishes to pursue their complaint.

After the investigator reviews the complaint, he or she will issue one of two letters to the complainant: a closure letter or a letter of finding (LOF). A closure letter summarizes the allegations and states that there was not a Title VI violation and that the case will be closed. An LOF summarizes the allegations and the interviews regarding the alleged incident and explains the actions of the agency in response to the finding. If the complainant wishes to appeal the decision, he or she has 10 days after the date of the closure letter or the LOF to submit a written request to the Executive Director of DDOT.

A person may also file a complaint directly with the Federal Transit Administration Office of Civil Rights:

Federal Transit Administration  
Office of Civil Rights  
East Building, 5<sup>th</sup> Floor - TCR  
1200 New Jersey Avenue SE  
Washington, DC 20590

DDOT's complaint form and all procedures are also located on our website:  
[www.detroitmi.gov/ddot](http://www.detroitmi.gov/ddot).

## **Title VI Complaint Form**

A copy of the DDOT Title VI Complaint Form is shown in Appendix A and is available on DDOT's website at [www.detroitmi.gov/ddot](http://www.detroitmi.gov/ddot).

## Title VI Investigations, Complaints, and Lawsuits

DDOT has evaluated three (3) Title VI complaints in the period of the 2018-2020 Title VI Program. A full record of Title VI complaints and investigations is summarized in Table 2.

**Table 2 - Title VI Investigations, Complaints, and Lawsuits**

CASE NUMBER	COMPLAINANT	RESPONDENT	DATE FILED	SUMMARY OF ALLEGATIONS	TYPE	DATE CLOSED	DECISION
DDOT-2019-1	B. Barrow	B. Barrow	05/24/19	Racial discrimination - driver would not lower the bus for an African American passenger but lowered the bus for a Caucasian passenger.	Complaint	Closed 7/11/19	Unable to contact complainant. Complaint closed.
DDOT-2019-02	Donald Rand	Donald Rand	11/19/19	Race, color, and national origin discrimination due to mid-city loop route is not a two-way route.	Complaint	Closed 12/20/19	The title vi and ada coordinator made several attempts to contact the complainant for clarity and resolution, however, they were unsuccessful and administratively closed the complaint.
DDOT-2020-01	Catherina Jones Jackson	Catherina Jones Jackson	02/09/20	Low-income community discrimination against student and seniors' community due to schedule monitors and text my bus app not working. Also, service delays.	Complaint	Closed 2/12/20	No violation found administratively closed

## Title VI Training

The City of Detroit's Human Rights/Resources Department provides Title VI training to all employees during new employee orientation training. All DDOT employees are required to read and sign an "Acknowledgement of Title VI Plan Policy" form during the onboarding process. The Acknowledgment of Title VI Plan Policy form is shown below in Appendix B. DDOT's Office of Compliance Division conducts Title VI Awareness training for all safety-sensitive and non-safety sensitive employees.

## DDOT Non-Elected Advisory Committees

DDOT has three non-elected advisory committees:

- DDOT Advisory Commission Council (DACC)
- Local Advisory Council (LAC)
- Paratransit Appeals Board (PAB)

DDOT actively encourages minority representation on the LAC, PAB, and DAC. We directly reach out to community-based organizations to increase awareness of the committees and solicit applications for new members. DDOT's Office of Compliance and the Executive Office solicit applications during general public meetings, committee meetings, and community-based organizations events. DDOT encourages all interested individuals to apply via a downloadable application (Appendix C) and return it to us by email at [DDOTTitle6@detroitmi.gov](mailto:DDOTTitle6@detroitmi.gov) or mail (see address below). The application is also available in Spanish and Arabic. For committee openings, please call (313) 933-1300.

### **Mailing Address:**

Detroit Department of Transportation  
Attention: Office of Compliance  
100 Mack  
Detroit, MI 48201

### **Local Advisory Council (LAC)**

The LAC serves as a liaison to the disabled community. This advisory body advises DDOT in areas relating to the planning, delivery, and operation of fixed route and Detroit MetroLift paratransit services. The meetings provide a forum for comments on proposed changes in service, policies, and procedures.

The purpose of the LAC is to review and comment on DDOT's Section 10E plans, Americans with Disabilities Act Accessibility plan, and proposed service changes and policies. The LAC is composed of nine (9) members, with at least one (1) member being a resident of each of the seven (7) City Council Districts and two (2) at-large members, who shall represent the Detroit Area Agency on Aging. Meetings are held four (4) times a year on the third Tuesday of the months of February, May, August, and November.

### **Paratransit Appeals Board (PAB)**

The PAB is a requirement of the Americans with Disabilities Act of 1990 (ADA) (49 Part 37 Subpart F, Section 37.125), that DDOT will accept appeals from its determinations of eligibility. The PAB shall hear the appeals of individuals who were denied paratransit eligibility, service suspension, or limitations or conditions place on eligibility.

The Appeals Board consists of six (6) members, three (3) members that have disabilities, and have significant knowledge of both the fixed-line and paratransit bus systems. The other three (3) members may be agency representatives who have the same body of knowledge, and it is preferred that they have knowledge of disabilities. It is also desired that the Appeals Board members either live or work in Detroit, Hamtramck, or Highland Park. Their appointments do not expire. The Paratransit Appeals Board meets monthly, unless otherwise noted, on the fourth Wednesday at 10:00 a.m. in the DDOT administration building. This meeting is closed and not open to the public.

### **DDOT Advisory Commission Council (DACC)**

The DACC improves transit services planning, and programs by advising DDOT's staff members and the executive director of concerning transit policy and service issues. The DACC ensures that the public transit system meets the needs of the community.

The DACC is composed of a minimum of seven (7) members, who are residents of each of the seven (7) City Council Districts. Meetings are held four (4) times a year on the third Monday of the months of March, June, September, and December. Occasionally, there are special meetings in the intervening months. A quorum of four (4) members constitute the majority. Members are appointed by the director of DDOT.

## **Minority Representation on Committees**

Table 3 compares the racial breakdown for each of DDOT's three committees to the approximated rider profile of DDOT's service area. All three committees have a high percentage of minority representation.

**Table 3 – Minority Representation on Committees**

NAME	CAUCASIAN	LATINO	BLACK	ASIAN AMERICAN	NATIVE AMERICAN	OTHER	TOTAL
<b>Population of Detroit</b>	10%	8%	80%	1%	0%	1%	100%
<b>DDOT Advisory Commission</b>	15%	15%	70%	0%	0%	0%	100%
<b>Paratransit Appeal Board</b>	14%	0%	86%	0%	0%	0%	100%
<b>Local Advisory Council</b>	0%	0%	100%	0%	0%	0%	100%

# Title VI Public Participation Plan

## Introduction

The Detroit Department of Transportation (DDOT) developed this Public Participation Plan (PPP) to guide the decision-making process for all transit planning activities that require public outreach. The DDOT PPP is designed to meet the Federal Transit Administration's (FTA) Title VI regulations to provide "early and continuous opportunities for the public to be involved in the identification of social, economic, and environmental impacts of proposed transportation decisions." With this in mind, DDOT developed the PPP with the flexibility to adjust appropriately and as needed to accommodate public involvement.

DDOT is the largest public transit provider in Michigan, and serves the City of Detroit, surrounding suburbs, and neighboring cities, including Highland Park and Hamtramck. DDOT prides itself on providing reliable, clean, safe, and efficient service to an average of 85,000 riders daily.

This PPP complies with Title VI of the federal Civil Rights Act of 1964 (42 U.S.C. 2000d), the Americans with Disabilities Act (as defined in Title 49, Part 37, of the United States Code), Executive Order 12898, Federal Actions on Environmental Justice, Executive Order 13166 on Limited English Proficiency, and other relevant laws and guidance to ensure consideration of social equity, environmental justice, and accessibility. DDOT is committed to ensuring that no person is excluded from participation in, denied the benefits of, or discriminated against under its projects, programs, or activities on the basis of race, color, creed, national origin, sex, age, or disability as provided in state and federal law.

Lastly, the PPP is an ongoing working document that will be updated and adjusted every three years in response to issues and circumstances throughout the planning process per FTA Circular 4702(b).

## Goals & Objectives

The goal of this PPP is to create a variety of opportunities for minority, low income, limited English proficient (LEP) populations, individuals, organizations, agencies, and other stakeholders to provide meaningful input about DDOT's transit-related services and programs.

DDOT will use the following objectives to achieve this goal:

- **Input and Participation** – Public comments received by DDOT are reviewed and considered during the planning stage of projects and policies.
- **Consistent Communication** – DDOT staff will communicate with communities in our service areas to develop trust and to allow for public input.
- **Diversity** – DDOT will monitor that participants represent minorities, low incomes, and LEPs by conducting voluntary public involvement surveys at public meetings.

- **Accessibility** – DDOT will ensure opportunities to participate by selecting venues that are physically, geographically, linguistically, and culturally accessible.
- **Partnerships Satisfaction** – DDOT will provide meaningful outlets for people who take the time to participate to join the discussion and provide feedback.

### **Public Participation Strategies**

The following strategies will be used to reach the PPP goal. Each strategy includes those used to inform (Public Information), reach out to invite participation (Outreach), and those to seek input (Public Input). Each strategy could best be used and is based on input collected from the community and DDOT staff experience.

### **Printed Materials Produced by DDOT (Public Information and Outreach)**

Outreach information is publicized in printed materials and produced by DDOT such as rider notices, flyers, posters, and interior cards (Appendix D). Based on experience, DDOT has found a combination of these strategies along with social media notifications, to be the most effective forms of notification. Per the Language Assistance Plan, vital information in printed materials are translated into Spanish and Arabic, and into additional languages by request. Vital documents are defined as those documents without translation a person would be unable to access services.

The following are written communications that are printed in both Spanish and Arabic:

1. Complaint Procedure
2. Compliant Forms
3. Public Meeting Notices

### **DDOT Website (Public Information, Outreach, and Public Input)**

DDOT's website, [www.detroitmi.gov/ddot](http://www.detroitmi.gov/ddot) is a communication tool providing substantial information about DDOT policies, strategies, and plans. DDOT's website provides the option to translate many of the web pages into a number of languages.

### **Letters and Postcards Distributed by Mail (Public Information, Outreach, and Public Input)**

Participation strategies are occasionally publicized by letter or postcard distributed by mail. It is an effective strategy for reaching a specific geographic area or population group.

### **Transit Information Resources (Public Information and Outreach)**

Bus schedules and service updates are available in the Rosa Parks Transit Center to provide transit information and to conduct outreach.

### **Media Targeted to Ethnic Communities (Public Information and Outreach)**

Participation opportunities may be publicized through newspaper publications serving English, Spanish, and Arabic speaking audiences.

### **Coordination with Community Events (Public Information, Outreach, and Public Input)**

In cooperation with the City of Detroit, local community groups, small businesses, and a host of other external stakeholders, DDOT hosts information booths to provide materials regarding DDOT service and outreach strategies at community events.

### **Communication with Elected Officials (Public Information and Outreach)**

DDOT's executive staff and the Marketing Division provide updates about DDOT's plans and projects to federal, state, and local elected officials. The executive staff sends letters and/or emails summarizing DDOT's decisions and potential decisions in advance of public notification to ensure elected officials are aware of transit issues in the event they receive comments from their constituents and to offer the opportunity to provide their input.

### **Meeting with Civic and Community Organizations (Public Information, Outreach, and Public Input)**

DDOT provides updates on its policies, projects, and strategies by accepting invitations to participate in scheduled meetings of local, civic, and community organizations. These gatherings provide an opportunity to make a presentation, answer questions, and to address transit issues.

### **Informational Public Meetings (Public Information, Outreach, and Public Input)**

DDOT conducts Community Input, Detroit Advisory Commission Council, Local Advisory Council, and several different types of meetings throughout the year. The meetings are designed to share information about upcoming initiatives, services, or programs. Other meetings are designed to engage the public to provide their input, feedback, or comments about proposed service changes. Meeting agenda and minutes are provided to attendees.

### **Meeting Formats & Logistics**

#### *Open House and Workshops (Public Information, Outreach, and Public Input)*

This format provides opportunities for participants to receive information at their own pace by visiting a series of informational meetings that may include table-top displays, maps, Power Point presentations, photographs, visualizations, and other tools. Participants have the opportunity for one-on-one conversations with the appropriate DDOT staff. Occasionally, these forums include a short educational presentation followed by a forum. Participants are given comment forms to provide written comments. DDOT staff is available to take verbal comments and transcribe them to provide a written record. The open house and workshop format is effective when DDOT is seeking to propose service changes.

#### *Informational Meeting (Public Information, Outreach, and Public Input)*

These meetings are usually focused on a specific topic and feature an informational presentation followed by a discussion and/or a question and answer and comment period. The comment

period can be formal or informal depending on the number of participants and the type of meeting. Individual comments are often limited to two minutes.

### *Meeting Venues (Public Information, Outreach, and Public Input)*

Venues for meetings are selected to be fully accessible for persons with disabilities, and in general, served by public transit. DDOT considers the best areas or communities to conduct meetings and hearings by first examining the topic and/or issues that may affect riders and communities. DDOT secures meeting venues with consideration to time of day, length of time required for the meetings, and the number of expected attendees. Venues include public libraries, local schools, colleges, and state or city-owned buildings.

### *Meeting Times (Public Information, Outreach, and Public Input)*

Public participation meetings are scheduled at varying times of the day and preferably on different days of the week. Typically, meetings are conducted on weeknights after traditional work hours.

### *Number of Meetings (Outreach and Public Input)*

Some transportation decisions require more meetings than others. DDOT has held a minimum of one (1) meeting to more than twenty (20) meetings for system-wide decisions affecting community members.

## **Community Meeting Considerations**

### *Scheduling (Outreach and Public Input)*

Community meetings are scheduled to allow a minimum of two (2) weeks between the last meeting and the next phase of the project.

### *Virtual Meetings (Public Information, Outreach, and Public Input)*

Meetings will be conducted using Zoom ([www.zoom.us](http://www.zoom.us)) in that participants can join via a smartphone, tablet, or computer via the Zoom app and join the meeting with an ID number or by phone with the dial-in number. Participants will be able to submit questions or comments in advance to the meeting to [DDOTComments@detroitmi.gov](mailto:DDOTComments@detroitmi.gov). DDOT virtual meetings will follow a similar format as in-person meetings.

### *Surveys (Public Information, Outreach, and Public Input)*

On-board ridership surveys are completed once every three years to hear and learn concerns from our customers and communities regarding DDOT services. These surveys also provide DDOT with a snapshot of ridership demographics to service them better. Surveys are compiled and analyzed utilizing expert, experienced third-party contractors to ensure that the results are fair, unbiased, inclusive, and address all markets that could be affected by the results of the survey.

### *Telephone Information and Comment Line (Public Information, Outreach, and Public Input)*

DDOT Call Center agents and other DDOT Departments may receive complaints alleging violation of Title VI and are responsible for forwarding such complaints to DDOT's Office of Compliance for processing and monitoring. DDOT welcomes suggestions, questions, compliments, or complaints at any time via DDOT Customer Service at (313) 933-1300 or by email to [DDOTComments@detroitmi.gov](mailto:DDOTComments@detroitmi.gov).

### **Public Hearing Process**

DDOT is required to conduct public hearings when proposing the following actions:

- Prior to raising or decreasing fares
- Implementing a major service change in transit service
- If there is any reduction in service of 20 percent or more, the number of miles of a route, or 20 percent or more of the number of revenue vehicle miles of a route computed on a daily basis for the day of the week for which the change is made
- Before eliminating an existing route
- When a new route is established
- New facilities

### **Procedures for Planning Public Hearings**

DDOT follows a set of established procedures for planning public hearings, which are described in the following bullet points:

- Secure venues with ADA accessibility for in-person hearings.
- Prepare written material to promote public involvement.
- Translate vital documents for LEP populations within the service area affected by the proposed changes.
- Notify elected officials whose constituents may be affected by the proposed service changes.
- Fifteen (15) days prior to the first hearing date begin public outreach:
  - Post hearing notices at transit centers and hubs affected by the proposed change.
  - Post the proposal of changes in, English, Spanish, and Arabic at DDOT headquarters in the lobby of 100 Mack and on the DDOT website.
  - Disseminate hearing information and proposed changes.
  - May publish hearing notices in any of the following: major newspapers, Spanish and Arabic language newspapers, local/community newspapers, and newsletters.
- Share published material with local community groups and organizations.
- Notify community and neighborhood leaders and advocates, in addition to groups or organizations that may be affected by the proposed changes.
- Arrange for a stenographer, audio system, and language interpreters (when requested).

- Secure hearing teams, outreach employees, and staff for registration and customer assistance.
- Prepare additional printed materials for distribution at the in-person public hearings:
  - Copies of the proposed changes (English, Spanish, and Arabic)
  - Copies of the hearing announcements (English, Spanish, and Arabic)
  - Comment forms for written testimony
- Fifteen (15) days comment period following the final public hearing:
  - Collect and document comments received at the hearing and via USPS and email.
  - Once the comment period concludes, the DDOT office responsible for proposing the change and making the final decision will provide copies of all written comments and verbal testimony from the hearing.
  - File all hearing documents: transcripts, sign-in sheets, written testimony, letters received, and documentation of publication.
  - Provide comment forms for written testimony (English and Spanish).

### *Options for Submitting Input*

Official comment forms are available at public hearing registration tables, DDOT headquarters, and online at [www.detroitmi.gov/ddot](http://www.detroitmi.gov/ddot). All comments, verbal and written, receive the same consideration when making decisions. Interested persons may choose one of the following four (4) methods to submit their comments, which are recorded in the official hearing documentations:

- Verbal testimony at a public hearing;
- Submit written statement at a public hearing using a specific DDOT comment form;
- Submit written statements via email;
- USPS with or without the specific DDOT comment form.

## **Ongoing Efforts**

### *Partnerships with Community Based Organizations*

DDOT's marketing and transit ambassador divisions have partnerships with local businesses and community associations. These departments are responsible for planning public hearings, workshops, informational meetings, and inviting public involvement in the decision-making processes.

### *Translation and Interpretive Services*

DDOT is committed to reducing the barriers encountered by persons with limited English proficiency (LEP) when accessing services and benefits. To minimize or eliminate any language barrier, the Marketing Department works with the City of Detroit's Civil Rights Inclusion & Opportunity department to provide on-demand language interpretation via telephone, on-site at specified locations, and written documents.

Translation and interpretation vendors are available 7 days per week, 24 hours per day. Printed public information is translated into Spanish and Arabic. However, requests for translations into other languages are accommodated. Onsite language interpretation service is provided upon request for public meetings/hearings. The use of informational posters, videos, or other visual aids are used to reduce barriers for LEP persons.

### *DDOT's Continuing Public Participation Strategies*

DDOT continues to promote and enhance the use of its ongoing public participation strategies to reach minority, low income, and LEP populations. DDOT will conduct proactive outreach to expand the reach, inclusivity, and effectiveness of these ongoing strategies. Examples of existing strategies include:

- DDOT website: [www.detroitmi.gov/ddot](http://www.detroitmi.gov/ddot) and [www.RideDetroitTransit.com](http://www.RideDetroitTransit.com)
- DDOT Facebook page: [www.facebook.com/rideddott](http://www.facebook.com/rideddott)
- DDOT Twitter page: [www.twitter.com/rideddott](http://www.twitter.com/rideddott)
- DDOT Instagram page: [www.instagram.com/rideddott](http://www.instagram.com/rideddott)
- DDOT LinkedIn: [www.linkedin.com/company/Detroit-department-of-transportation](http://www.linkedin.com/company/Detroit-department-of-transportation)
- Email: [DDOTComments@detroitmi.gov](mailto:DDOTComments@detroitmi.gov)
- Dart (Detroit Transit) Mobile Payment App: [www.thedartapp.com](http://www.thedartapp.com)
- Customer Service: (313) 933-1300 Monday through Friday from 6 a.m. to 6 p.m., or by mail at 100 Mack, Detroit, MI 48201
- Email subscription: sign up to receive emails at [DDOTComments@detroitmi.gov](mailto:DDOTComments@detroitmi.gov)
- Public information: written materials, public notices, reports, presentations
- Web-Based Communications: website, social media platforms, email updates, text messaging
- Media: earned and paid media
- Community Input Meetings: 5 p.m. every third Thursday of each month
- Local Advisory Council (LAC): 10 a.m. every third Tuesday of the month quarterly
- DDOT Advisory Commission Council: 10:30 a.m. every third Monday of the second month quarterly
- Public workshops and hearings
- Informational posters at the Transit Center and Hub
- American Sign Language (ASL) interpreters and translation professionals in attendance at meetings to provide content in Spanish, Arabic, or other languages (available upon request)
- Language line assistance: 1-855-393-4432
- Staff language assistance
- Audio recording: devices to obtain feedback and comments at meetings
- Research: gained from public opinion focus groups, roundtable discussions, and surveys

- Public Information: Flyers, posters, and brochures, email and website, presentations, meetings, events, community locations, media, and other notices and advertisements
- Multimedia Presentations
- Public Notices
- Frequently Asked Questions (FAQs)
- Presentations to City Officials
- Participation in Community Events
- Outreach to Major Employers and their Employees
- Outreach to Local Colleges and Universities
- Outreach to Community-Based Organizations
- Outreach to Local Transit Partners and Travel Groups
- Wi-Fi Menu
- Email Alerts
- Micro-Surveys
- Distribute News Releases/Media Alerts to Local Media
- Press Conferences
- Paid Media: Newspaper advertising, public service announcements, and online ads

### **Overview of Outreach Strategies**

Listed below are steps representative of the strategy used to encourage public participation for a variety of DDOT projects. The list provides guidance towards developing a tailored strategy distinctive to each project identified as having impacts on minority, low income, and LEP communities. This demonstrates the level of specificity DDOT could provide when developing outreach strategies for public participation regarding transportation decisions. At the community level, DDOT may utilize the following steps to develop and implement a geographically focused public participation strategy:

1. Identify Target Populations and Public Participation Needs
  - Identify significant populations for targeted outreach.
2. Coordinate Internally
  - Marketing and Planning and Scheduling Development will determine the most appropriate form of outreach as well as the goals and objectives for meetings.
  - Develop draft public participation strategies.
  - Identify the best way to publicize the public participation strategies, select meeting dates and venues, and determine translation needs.
3. Coordinate with Community-Based Organization Partners (CBO)
  - Identify CBO partners in the areas affected by a project or proposed service changes.

- Consider the following types of CBOs to reach minority, low income, and LEP populations within the affected areas: faith-based, geographic-specific such as neighborhood and community associations, education, social services, recreation, environmental, political, youth and senior oriented organizations.
  - Explain the desired outcomes for the different public participation strategies such as sharing information, collection input, and setting community priorities.
4. Conduct Outreach
    - Ensure all printed material clearly describe the issue and purpose of meetings or public participation activities.
    - Publicize the activities.
  5. Identify Language Interpretation Needs
    - Identify possible language interpretation needs, translate outreach documents, and provide language interpretation services at activities when requested.
  6. Implement Public Participation Strategies
    - Implement the strategies identified in the public participation strategy.
  7. Compile, Review, and Report Results of Public Feedback
    - Continue to review the participation objectives established at the beginning of PPP strategy development and monitor progress and performance.
    - Communicate the results back to the community.

## **Public Participation Measurement**

DDOT evaluates the public involvement strategies and techniques to make adjustments as needed. These evaluations may include:

- A summary of all outreach efforts (Appendix E).
- An assessment of how effective the efforts are to obtain input from minority, low income, LEP populations reached and the type of input provided.
- An assessment of the public involvement effort, including the number of meetings/events participated, survey responses, number of comments received, and the number of media impressions.

# Language Assistance Plan

## Introduction

The Detroit Department of Transportation (DDOT) is committed to serving individuals who may require language assistance. This Language Assistance Plan (LAP) includes measures that are currently provided by DDOT to ensure meaningful access to its transit services. The plan is an in-depth language study which was designed to reduce barriers to transit usage by individuals who may require language assistance. Individuals who have a limited ability to read, write, speak, or understand English are characterized as limited English proficient (LEP).

This LAP may use a combination of data sources – including Census figures, ridership surveys, frontline staff interviews or surveys, and data on riders’ requests for translation or interpretation – to understand the use of DDOT services. DDOT, language accommodation resources are housed under the Office of Compliance. The Title VI Coordinator and ADA Coordinator are responsible for coordinating across departments to ensure resources are made available and that staff trained in the appropriate protocol.

## LEP Four Factor Analysis

The Four Factor Analysis provides a framework through which recipients of federal funding can determine the extent of their obligation to provide services to LEP individuals. The FTA requires that all recipients use the Four Factor Analysis to ensure their programs, policies, and activities comply with Title VI regulations, and to aid in Language Assistance Planning. The following factors were taken into account when developing DDOT’s Language Assistance Plan:

### **Factor 1: The number and proportion of LEP persons eligible to be served or encountered by a program, activity, or service of DDOT.**

#### *How LEP Persons Interact with DDOT*

DDOT LEP riders interact with DDOT through the usage of the fixed route and paratransit bus services. LEP persons interact with bus operators, security officers, and customer service agents. They provide trip planning aids, including system maps, route schedules, directions, and other printed materials or online resources. Riders interact with DDOT staff in the Reduced Fare office, Transit Center, and administrative office when seeking assistance with relevant programs. In addition, they solicit help from and provide feedback to DDOT staff at public outreach activities. Finally, LEP riders interact with DDOT’s transit police force.

#### *Frontline Staff Interviews or Surveys*

To further address the questions of how, why, and where LEP persons interact with DDOT, in October 2019, the Office of Compliance conducted interviews with frontline staff while monitoring service standards. DDOT planned to conduct an “Operators” survey during the fiscal year of 2020; however, due to the COVID-19 pandemic the survey was not conducted.

The staff interviewed offered insight on languages frequently encountered during LEP interactions, common LEP rider boarding locations along routes, and issues commonly arising (such as directions or fare payment). Table 4 highlights language groups most commonly encountered; and routes most likely to serve LEP riders (as identified by DDOT Office of Compliance personnel). Spanish and Arabic were identified consistently.

**Table 4 – 2019 DDOT Staff Interviews Summary**

2019 DDOT STAFF INTERVIEWS SUMMARY	
Language Groups Most Commonly Encountered	Routes Where LEP Speakers Most Commonly Encountered
<ul style="list-style-type: none"> <li>Spanish</li> <li>Arabic</li> <li>African Languages</li> </ul>	<ul style="list-style-type: none"> <li>1-Vernor</li> <li>2-Michigan</li> <li>10-Greenfield</li> <li>40-Russell</li> <li>42-Mid-City Loop</li> <li>89-Southwest Direct</li> </ul>

Source: DDOT Office of Compliance Staff

### *LEP Communities and English Proficiency*

#### **Census Data**

Table 5 summarizes, by number of households, primary language groups spoken at home with at least 1,000 LEP speakers living in the DDOT service area. DDOT's service area includes Detroit, Hamtramck, Highland Park and bordering cities located in Macomb, Oakland, and Wayne counties.

The analysis determined that 85% of DDOT's service area population speaks only English. The analysis identified nine (9) languages in DDOT's service area that meet the Safe Harbor threshold of 1,000 speakers. Arabic households who speak English less than "very well" represent 33,690 (2.04%) of DDOT's population. Spanish households who speak English less than "very well" represent 25,055 (1.52%) of DDOT's service area population. The other seven (7) languages that speak English less than "very well" was less than 0.2% of DDOT's service area population. Figures 5-14 shows the total number LEP populations for each language that met the Safe Harbor threshold within DDOT's service area.

**Table 5 – Speak English Less Than “Very Well”**

2018 AMERICAN COMMUNITY SURVEY 5-YEAR ESTIMATE – C16001 SPEAK ENGLISH LESS THAN “VERY WELL”		
<b>Total Population of 5 Years and over</b>	<b>1,645,986</b>	
Speak Only English	1,410,073	85%
Arabic	33,690	2.04%
Spanish	25,055	1.52%
Other Indo-European Languages	17,025	1.03%
Russian, Polish, and other Slavic Languages	3,857	0.23%
Chinese	2,644	0.16%
Other Asian and Pacific Island Languages	2,169	0.13%
Other and Unspecified Languages	1,266	0.08%
Vietnamese	1,164	0.07
Korean	1,058	0.06%

Source: U.S. Census American Community Survey 2018 “Language Spoken at Home 5-Year Estimates” (Table C16001)

### Ridership Survey

Ridership survey data offers additional insight into LEP status in the DDOT service area. DDOT’s 2018 Title VI On-Board Ridership Survey was completed in September 2019 ([Appendix F](#)). A total of 1602 riders was surveyed on weekdays and weekends throughout various times of the day. The surveys was collected between July 18, 2018 and August 5, 2018.

The survey results in Table 6, shows that the primary language spoken by DDOT’s ridership is English. Two percent (2%) of DDOT’s riders surveyed speaks Spanish in the home, while one percent (1%) speaks Farsi (Arabic). Participants were also asked if they speak English; ninety-eight (98%) answered yes, while one percent (1%) answered Spanish.

In sum, the ridership survey results largely reinforce findings from data obtained from the Census: While LEP ridership of DDOT services is relatively quite low, Spanish and Arabic are the predominant LEP language groups among the DDOT rider base.

**Table 6 – 2018 Title VI On-Board Ridership Survey Results**

<b>PRIMARY LANGUAGE SPOKEN IN THE HOME</b>	97%-English 2%-Spanish 1%-Farsi
<b>ENGLISH SPEAKING</b>	98%-English 1%-Spanish

## Literacy Skills of LEP Populations in their Native Languages

DDOT takes into account that not all LEP riders are literate in their home language. To ensure language access for non-literate LEP individuals, DDOT may choose to incorporate universal visuals and graphics into outreach materials. Such an intervention can effectively reach riders with low literacy. In addition, DDOT will strive to collect data on literacy in native languages via future surveys.

**Figure 5 - Total English-Speaking Population in DDOT's Service Area**

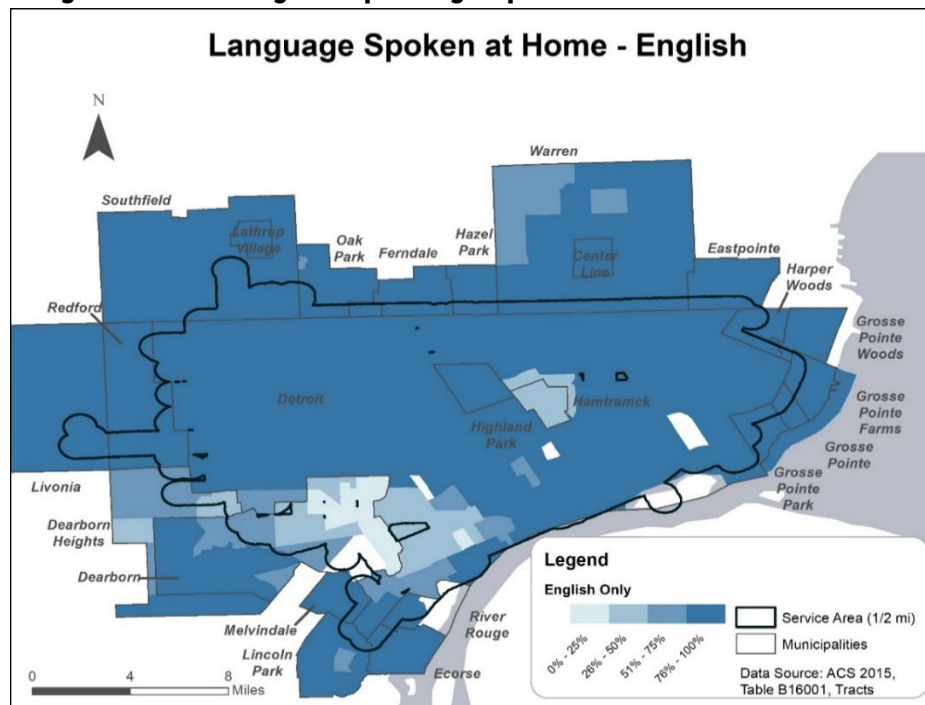

Figure 6 - Total Arabic Speaking Population in DDOT's Service Area

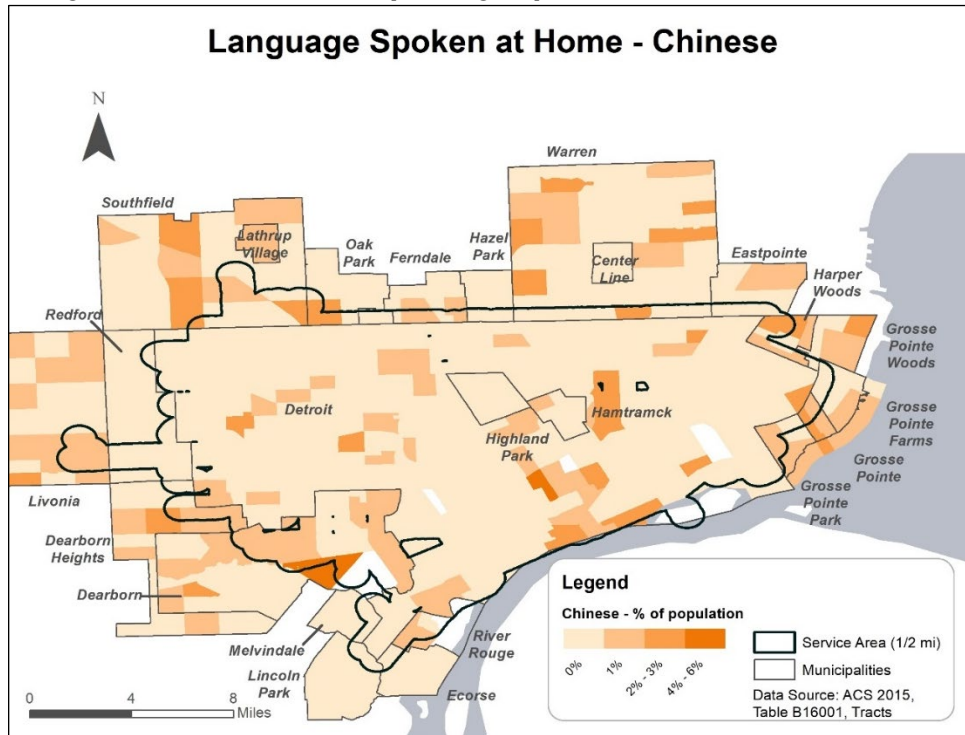

**Figure 8 - Total Other Indo-European Speaking Population in DDOT's Service Area**

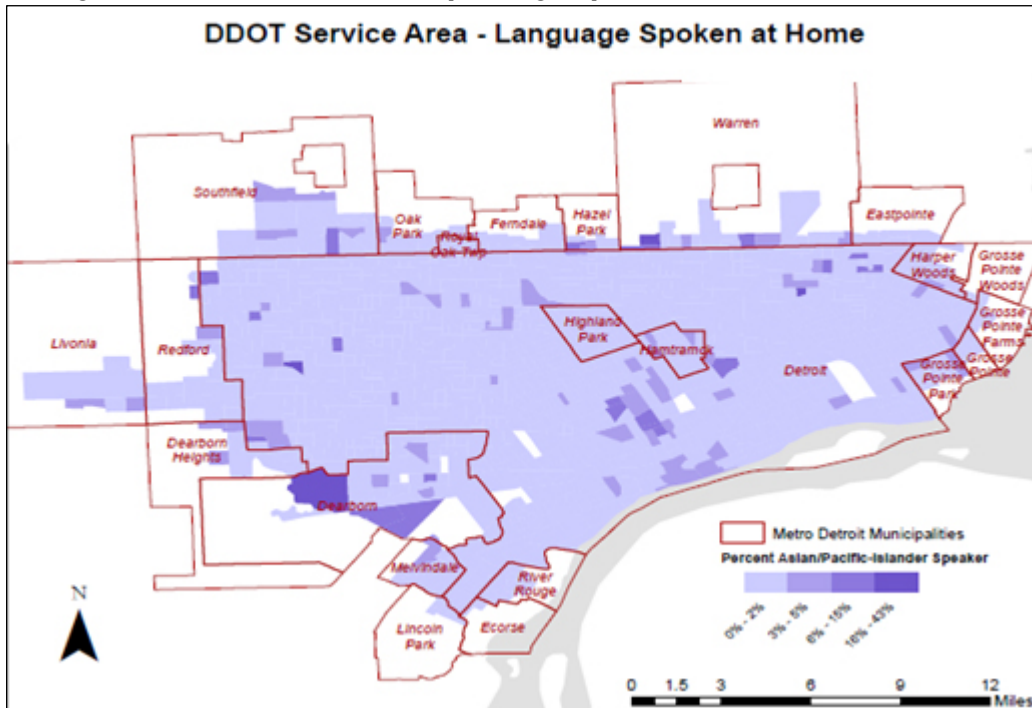

**Figure 9 - Total Russian Speaking Population in DDOT's Service Area**

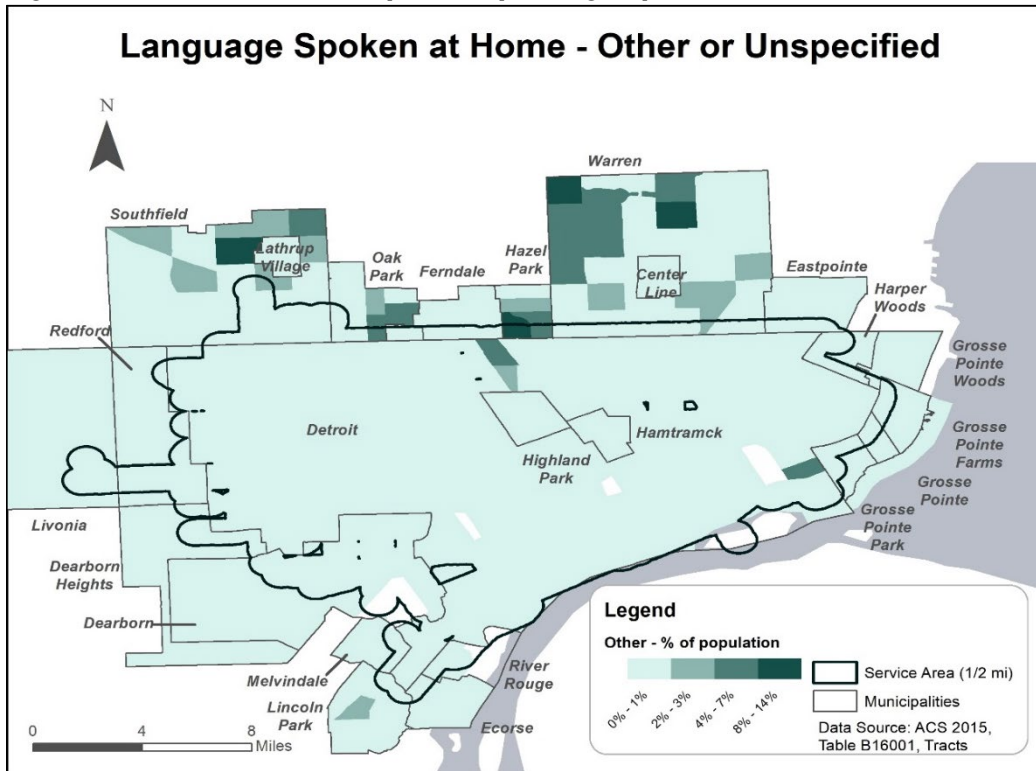

**Figure 10 - Total Chinese Speaking Population in DDOT's Service Area**

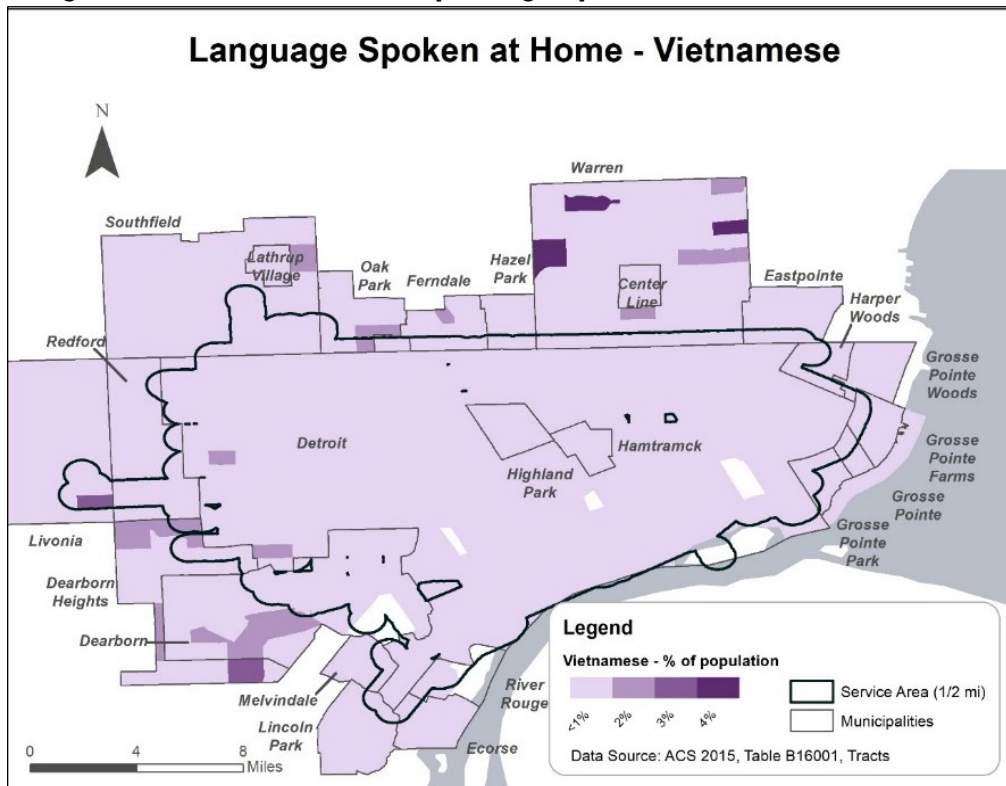

**Figure 11 - Total Other Asian Speaking Population in DDOT's Service Area**

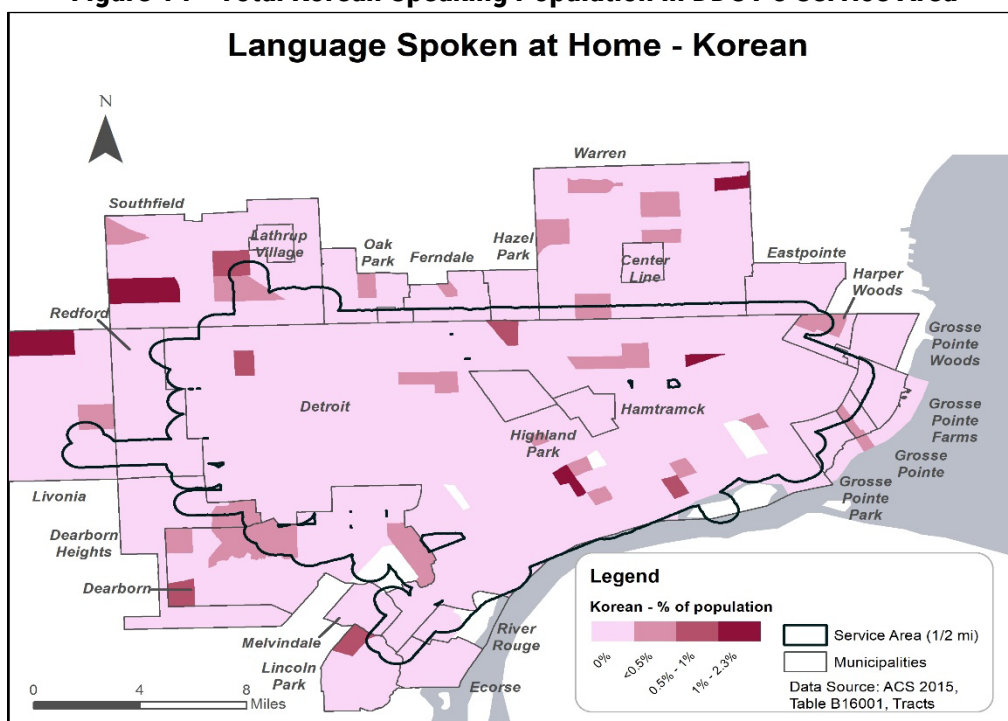

**Figure 12 - Total Other or Unspecific Speaking Population in DDOT's Service Area**

**Figure 13 - Total Vietnamese Speaking Population in DDOT's Service Area**

**Figure 14 - Total Korean Speaking Population in DDOT's Service Area**

## **Factor 2: The frequency with which LEP individuals come in contact with DDOT programs and services**

### *Language Phone Line Usage*

During the period spanning October 2018 through August 2020, DDOT's customer service agents used the language phone line twice to assist customers requiring language assistance in Spanish. There is no cost for providing language line services. The total cost of providing the translation of documents or interpreter services during this period was \$6,204.

## **Factor 3: The importance of the programs, activities, and services provided by DDOT to the LEP population**

DDOT understands that providing public transportation access to LEP individuals is crucial, and denial or delay of access to such services could have serious or even life-threatening implications for LEP populations. An LEP individual's inability to utilize public transportation effectively may adversely affect her or his ability to access health care, education, or employment.

DDOT recognizes the significance of transit services and it is that consideration which underscores DDOT's commitment to accommodating the LEP population. DDOT reviews survey data from a number of different perspectives and, on an ongoing basis, uses it to assess a variety of transit service provisions. Independent of language considerations, DDOT sorts and

monitors data relating to portions of the DDOT Service Area that contain high concentrations of transit-dependent households.

DDOT takes all language-based considerations into account when providing transit or transit-related services for the LEP population.

**Factor 4: The resources available to the recipient for LEP outreach, as well as the costs associated with that outreach**

The City of Detroit provides DDOT with translation and interpreter services free of charge through the Department of Civil Rights, Inclusion, & Opportunity. Due to the low volume of translation/interpreter calls received via the Customer Service Center, interpretation services have been free of charge. DDOT's Marketing Division's annual budget includes funds to translate written documents and provide interpreters during public meetings; however, minimal requests are made by the LEP population. A bilingual staff member(s) assist with translating from English to the appropriate language at no cost. Title VI Notices are posted at all facilities in English, Spanish, and Arabic. DDOT may also place public ads in Arab American News and El Central Hispanic News. Community Input meetings are held every third Thursday of each month to receive customer feedback.

Vital documents are defined as those documents without a person would be unable to access services. The following are written communications that are printed in both Spanish and Arabic:

1. Complaint Procedure
2. Compliant Forms
3. Public Meeting Notices

DDOT has concluded that Spanish and Arabic are the most prevalent languages spoken by LEP persons in DDOT's service area and should be the primary focus of any translation of vital documents or language assistance activities.

There are seven (7) additional LEP populations in the DDOT's service area that meet the "Safe Harbor" law. Therefore, DDOT will translate vital documents for each eligible LEP language group that constitutes five percent (5%) or 1,000 persons, whichever is less, of the total population of persons eligible to be served or likely to be affected or encountered when public meetings are held in those communities. DDOT will also provide meaningful access to LEP individuals through language assistance when language services are requested.

All requests can be made by email to [DDOTComments@detroitmi.gov](mailto:DDOTComments@detroitmi.gov) or by mail to Detroit Department of Transportation, ATTN: Customer Services, 100 Mack, Detroit, MI 48201.

DDOT is committed to reducing the barriers encountered by LEP persons when accessing services and benefits. This section summarizes strategies DDOT employs to accomplish this

goal. DDOT does not anticipate that any strategy listed in this document will be cost prohibitive in terms of resources, staff, or dollars.

1. **Translation services via phone:** DDOT has access to interpreters who can assist riders with bus schedule information in more than 50 languages.
2. **Interpretation services:** DDOT has access to Arabic and Spanish interpretation services.
3. **Language Identification Cards:** “I Speak” language identification are available to quickly identify a LEP individual’s spoken language.
4. **Vital documents:** Title VI complaint procedure, complaint form, and public hearing meeting notices are available upon request in Arabic and Spanish.
5. **DDOT website:** DDOT’s Title VI Program and a Title VI complaint form are available in Spanish and Arabic and other documents on DDOT’s website (future implementation).
6. **Direct engagement with LEP population and community organizations:** Through working with various community organizations, DDOT will seek to identify and engage LEP populations in the community and inform them of available public transportation services and related language assistance mediums.
7. **Workshop/public hearing:** If a staff member knows that they will be presenting a topic that could be of potential importance to a LEP person or if staff will be hosting a meeting or a workshop in a geographic location with a known concentration of LEP persons, they will have meeting notices, fliers, advertisements, and agendas printed in an alternative language, such as Arabic and/or Spanish.

### *Training of Staff*

There are three (3) primary staff groups who come into contact with LEP individuals: Transit Equipment Operators, Customer Service Representatives, and Administration Staff.

1. Transit Equipment Operators have the greatest potential to interact with LEP person, through daily interaction with passengers.
2. Customer Service Representatives are also likely to come into contact with LEP persons by telephone or when direct contact with passengers.
3. Administration Staff are also likely to come into contact with LEP persons by telephone or in person during public outreach and engagement events.

LEP training all for all groups occurs during their initial training and orientation. This training includes what procedures to follow when encountering an LEP person. See [Appendix G](#) for the LEP training handout.

### *Monitoring and Updating the LEP Plan*

DDOT will routinely review and update its LEP plan as necessary. A full review of the LEP Plan will occur with each triennial Title VI Program submission. DDOT’s Office of Compliance

Division will be responsible for collecting and analyzing requested information, and assisting in investigating external complaints of discrimination.

**LEP Contact:**

Any questions or comments regarding this plan should be directed to the DDOT Title VI Coordinator at the address listed below:

Detroit Department of Transportation  
Alicia Miller - Title VI Coordinator  
100 Mack  
Detroit, MI 48201  
Phone: (313) 833-3658 or Fax: (313) 833-1496  
Email: [DDOTTtitle6@detroitmi.gov](mailto:DDOTTtitle6@detroitmi.gov)

## Approval Signature Page

### Language Assistance Plan

I have received, considered, and approve the Detroit Department of Transportation Language Assistance Plan.

---

C. Mikel Oglesby, Executive Director of Transit

Date

## Subrecipient Assistance & Monitoring Plan

All Subrecipients who receive payments from DDOT where funding originates from any federal assistance are subject to the provisions of Title VI of the Civil Rights Act of 1964 as amended. Written contracts shall contain non-discrimination language, either directly or through the bid specification package that becomes an associated component of the contract.

DDOT had no Subrecipients during this Title VI reporting period.

### Determination of Site or Location Facilities

In determining the site or location of facilities, DDOT will comply with the Title 49 CFR Section 21.9(b) (3) regulation by:

- Completing a Title VI equity analysis during the planning stage with regard to where a project is located or sited to ensure the location is selected without regard to race, color, or national origin.
- DDOT will engage in outreach to persons potentially impacted by the siting of facilities.
- DDOT should give attention to other facilities with similar impacts in the area to determine if any cumulative adverse impacts might result.
- If determined that the location of the project will result in a disparate impact, DDOT will only locate the project in that location if there is a substantial legitimate justification for locating the project there, and where there are no alternative locations that would have a less disparate impact on the basis of race, color, or national origin.

No facilities covered by these requirements were developed since the last Title VI Program submission in November 2018.

# REQUIREMENTS FOR FIXED-ROUTE TRANSIT PROVIDERS

---

## Service Standards and Policies

### Service Standards

This document outlines transit service standards for Detroit Department of Transportation. All standards regard the motor bus mode; the Department does not operate any other modes.

As outlined by Title VI, this document covers these required standards:

- Vehicle Load
- Vehicle Headways
- On-Time Performance
- Transit Amenities
- Service Availability
- Service & Fare Equity Analysis
- Vehicle Assignment

### Vehicle Load

Vehicle load can be expressed as the ratio of passengers to the total numbers of seats on a vehicle. For example, on a 40-seat bus, a vehicle load of 1.3 means all seats are filled and there are approximately 12 standees. A vehicle load standard is generally expressed in terms of peak and off-peak times.

DDOT's standard load factor for bus service is **1.25**, not to exceed **1.50** on a regular basis.

AVERAGE PASSENGER CAPACITIES				
Vehicle Type	Seated	Standing	Total	Maximum Load Factor
40 Foot Standard Bus	38	48	57	1.50
60 Foot Standard Bus	57	71	86	1.50

DDOT does not distinguish load standards for peak vs off-peak times. School dismissal times may cause short-term load surges. Staff will assess if school-related loads are consistent enough to warrant additional scheduled service.

The Service Development & Scheduling staff review monthly ridership for each route. If overcrowding is identified Service Development & Scheduling group will monitor the route

and/or trips affected. If overcrowding can be documented on five (5) separate occasions over a period of one month, Service Development & Scheduling will consider adding service at the next available opportunity, pending the availability of equipment and operators.

## **Vehicle Headways**

Vehicle headway is described as the amount of time between two (2) vehicles traveling in the same direction on a given route.

Standard headways are as follows:

- Weekday morning and afternoon peak period: **no less frequent than every 45 minutes**
- Weekday off-peak, weekends: **no less frequent than every 75 minutes**

Off-peak standards apply to routes that maintain the same frequency during peak and off-peak periods. No route shall have headways wider than every 75 minutes. If a route has a headway wider than every 75 minutes, Service Development & Scheduling will remedy the headway routes by adjusting frequency times at the next quarterly schedule change.

These factors determine the establishment of headways:

- Load factor
- Customer demand
- Ridership trends
- Proximity to other routes
- Standard “start and end” times of major destinations along the route
- Population trends
- Population density

## **On-Time Performance**

On-time performance refers to “schedule performance,” Schedule performance is measured by comparing if a vehicle completes a scheduled run between zero and five (5) minutes late in comparison to the established schedule. Mid-route on-time performance checks actual departure times against scheduled departure times. Departures that are six (6) or more minutes behind schedule are considered late. The count of on-time departures is divided by the total number of scheduled departures; the resulting percentage is the on-time performance rate. Using AVL data, DDOT Service Development & Scheduling produces an AVL On-Time report every week.

Standards measured by AVL Data are as follows:

1. On-target: **85% or better**
2. Needs improvement: 75% to 84%
3. Fail: below 75%

Routes that fall below target for six (6) consecutive weeks shall be reviewed. Service Development & Scheduling will remedy poorly performing routes by adjusting running times at the next quarterly schedule change.

### **Service Availability**

Service availability is a general measure of the distribution of routes within a transit provider's service area. As a municipal department, DDOT's transit service area is coterminous with Detroit city limits. Selected DDOT services operate beyond city limits. Such services may exist for these reasons:

- Linear routing along the border of Detroit
- Irregularly shaped municipal boundaries, causing incidental coverage to a neighboring jurisdiction that sits between different areas of Detroit
- Legacy transit routing never assumed by a suburban provider
- Route extensions to connect Detroit residents to major activity centers or transfer points that are outside of city limits (such services shall not be "free-standing" suburban routes, but rather suburban extensions of regular city-focused routes)
- Cross-municipal routes funded by regional agencies and operated by DDOT

These types of routes enter the service area of neighboring transit systems. DDOT does not set out to provide full coverage to suburban areas; as such, for the purposes of this standard, suburban areas receiving DDOT service are not considered part of the service area.

Standard service availability is as follows:

- Service area residents within 1/4 mile of a bus stop: 80%
- Service area residents within 1/2 mile of a bus stop with weekday all-day service: 95%

### **Analysis of Service Policies**

This section analyzes DDOT service policies among minority and non-minority routes. Policies in this area address how these amenities are distributed within a transit system, and the manner of their distribution determines whether transit users have equal access to these amenities. This is not intended to impact funding decisions for transit amenities. Rather, this applies after a transit provider has decided to fund an amenity.

## Transit Amenities

Transit amenities refer to items of comfort, convenience, and safety that are available to the general riding public. Fixed-route transit providers must set a policy to ensure equitable distribution of transit amenities across the system.

In regards to specific amenities, DDOT has established the following standards:

- **Seating:** DDOT does not have a bench or seating program. Benches exist only as part of shelters.
- **Escalators & Elevators:** DDOT operates only one elevator at a revenue facility. The elevator is located at a downtown bus station served by routes from all over the service area. All interaction with transit vehicles takes place on the ground floor of the bus station; the elevator is only useful for occasional events on the second floor of the building.
- **Information:** DDOT does not have an active program for on-street customer information. Limited maps and digital displays are provided at two transit hubs.
- **Waste Receptacles:** In partnership with Department of Public Works (DPW), DDOT places waste receptacles at high-ridership bus stops. A stop qualifies if it averages seven (7) or more boardings and alights per day. Such stops are distributed evenly throughout the service area.
- **Bike Rack:** DDOT installs bicycle racks on all transit buses. The bicycle racks are available on a first-come, first-served basis.
- **Shelters:** DDOT has developed standards for placement of shelters. They are as follows:
  - **Level of Service** - Level of service is measured in frequency (time between buses) and span (hours of operation per day). Bus stops with higher levels of service will be given higher priority for shelters.
  - **Stability of Route within Service Network** - Some routes run on corridors where service will always be needed. Others are located in areas where demand for service is likely to evolve over time, and where there may be a need to restructure the route to meet customer needs. Shelters are a long-term infrastructure investment, and as such will be directed toward bus stops whose locations and levels of service are likely to be constant over time.
  - **Site Dimensions and Pavement Characteristics** - Shelters must be safely sited and anchored, and installation sites must conform to the federal Americans with Disabilities Act and all other applicable laws and regulations. Sidewalk width, type and condition of pavement, and the presence or absence of driveways, crosswalks, and obstacles in the right of way may determine where and how shelters can be installed.
  - **Position on Route** - Bus shelters are an amenity for customers and are most useful at stops where customers tend to board rather than alight. Stops located

within 1 mile of the end of the route will be deprioritized for shelter installation. However, since different routes generate traffic at different points based on the destinations they serve, each route will be evaluated independently to determine which segments of the route should be prioritized for shelter installation.

- **Transfer Points** - Where two or more bus routes intersect, it is desirable to provide a pleasant waiting environment for customers seeking to transfer between them. Transfers between stable routes with high levels of service will be prioritized for shelter installation.
- **Stops Shared by Multiple Routes** - Where two or more routes share a bus stop location, the same amenity can be utilized by customers on different routes. Stops shared by stable routes with high levels of service will be prioritized for shelter installation.
- **Proximity to Major Destinations** - Many routes serve destinations where large numbers of people travel by bus. Destinations include schools, hospitals, and large retail outlets. Bus stops within 500 feet of such destinations will be prioritized for shelter installation.
- **Distribution of Shelters on Route** - To maintain an equitable distribution of amenities throughout the DDOT service area, locations within 1/2 mile of other shelter stops on the same route will be deprioritized for shelter installation.
- **Legacy Shelters** - Some existing DDOT shelters may not meet the above criteria, either because demand for service has shifted over time, or because they were evaluated according to earlier sets of criteria. In most cases, these shelters will be left in place until the end of their useful lives, but will not be replaced with new shelters once they become deteriorated or damaged beyond repair. Where necessary, legacy shelters may be moved to new locations where they will meet the needs of larger numbers of customers.
- **Shelter Requests from Customers and the Community** - DDOT will evaluate all shelter requests according to the above criteria, and will consider and prioritize them accordingly. While we will not accommodate every request we receive, we welcome customer input to help us recognize where unmet needs may exist.

## Vehicle Assignment

Vehicle assignment refers to the process by which transit vehicles are placed into service in depots and on routes throughout the transit provider's service area.

DDOT's vehicles assignment policy is to distribute bus vehicles relatively evenly among the two operating facilities with an aim to keep the average fleet age at each division as equal as possible, and as close as possible to the system average vehicle age. This ensures that no one division has a predominantly new or old fleet at a given time. The Vehicle Maintenance Division staff assigns buses to routes and operators. Assignment is often based on estimated route ridership by time of day; thus, vehicle size plays a role in vehicle assignment.

DDOT's fleet consists of 40-foot buses and 60-foot buses of varying ages. **The 60-foot articulated buses** are assigned based on ridership levels. Service Development & Scheduling selects high-ridership trips for coverage by articulated buses. The **40-foot hybrid buses** are assigned to both operating facilities and may be used on any route. DDOT will receive 40-foot electric buses in 2023 and will assign them to route based on the road infrastructure.

Otherwise, DDOT does not assign specific vehicles or vehicle types to specific routes. Any vehicle type, old or new, may appear on any route at any time. A review of daily vehicle assignments will exhibit this vehicle assignment technique.

## Service Standards Monitoring Report

As part of the Title VI Program update, the Federal Transit Administration (FTA) requires transit providers to monitor the performance of their transit system relative to their system-wide service standards and policies not less than every three years to remain in compliance with Title VI requirements. DDOT will monitor its service standards and policies every three years in order to ensure that potential problems are found and rectified in a timely fashion. DDOT will submit the results of its monitoring program as well as documentation verifying the Department Director's approval of the monitoring results to the FTA as part of its Title VI Program.

DDOT's service monitoring results are divided into six (6) sections corresponding to the four (4) standards and two (2) policies established in Circular 4702.1B for service monitoring:

- Standards
  - Vehicle Load
  - Vehicle Headway
  - On-Time Performance
  - Service Availability
- Policies
  - Distribution of Transit Amenities
  - Vehicle Assignment

Using the methodology and standards developed for each of these metrics in the Service Standards and Policies, DDOT concludes that there are no disparate impacts to minority or low-income populations in the levels of service that it provided. DDOT's October 2019 Service Standard Monitoring Report is provided in [Appendix H](#).

## Service & Fare Equity Analysis

Transit agencies are required to evaluate service and fare changes. The written procedures and results of service and/or fare equity analyses shall be included in transit provider's Title VI Program. DDOT developed standards and policies to meet this requirement. Measurements for service change are revenue hours and revenue miles.

### Major Service Change Policy

A service equity analysis will be conducted whenever DDOT implements a major service change to the bus system. A major service change is defined as the addition of, or reduction in, more than 20% of revenue hours and/or revenue miles on any one route.

#### *What does a Major Service Change mean?*

A major service change is analyzed by route and does not include pilots lasting less than one year, detours, or seasonal routes coming on or off their normally scheduled season. In order to be considered in an equity analysis, the route change must meet at least one of the following criteria:

1. New coverage area that is more than 1/5 mile from the original location. For example, if a route is redirected from 2<sup>nd</sup> St. to 3<sup>rd</sup> St., then it does not meet the qualification because the streets are less than 1/4 mile from each other.
2. A new route. This excludes identity changes such as name and number for existing service.
3. An elimination of a route. This excludes identity changes.
4. An extension or shortening of a route by 1/5 mile.
5. A 20% change in revenue miles or hours.

#### *Analysis Data*

Data used for determining Title VI route classifications and service area is based on the latest available census data for race (minority) and poverty (low-income) at the block-group level. Minorities are considered all population counts not under the "white only" race/ethnicity classification. While some agencies expand their low-income thresholds to capture people above the poverty line, they tend to serve populations with a median income well above the poverty line. Detroit's median income is at the federal poverty line and similar sized agencies use the same threshold.

**Table 7 - DDOT's Service Area Demographics**

DEMOGRAPHICS FOR DDOT'S SERVICE AREA		
Type	Total	Percent
<b>Total</b>		
Population	883,346	100%
<b>Race</b>		
White	223,327	25%
Black	575,781	64%
Latino	57,618	6%
Native American	2,378	0%
Asian	23,537	3%
Pacific Islander	376	0%
Other	20,420	2%
Minority	680,110	75%
<b>Income</b>		
Lower-Income	229,694	22%
Higher-Income	818,325	78%
<b>Language</b>		
English	686,027	84%
Spanish	44,655	5%
Indo-European	22,682	3%
Asian	4,647	1%
Other	61,766	8%

### Fare Change Analysis

Any change in DDOT's fare cost or structure will be analyzed. For fares, the total cost burden is analyzed rather than the hours, trips, and miles by any route. Calculations are based on pass cost and pass type used by minority/non-minority and low-income/non-low-income classifications. All costs are summed and compared between the populations. If the percent difference between the protected populations and their counter population is over more than 20%, then alternatives and justifications need to be made. If the percent difference does not exceed 20%, then we may proceed with the changes.

### *Methodology of the analysis*

1. Determine if the routes match the criteria for major service change on an individual basis.
2. Classify the routes that meet the criteria for a major service change as minority and/or low-income using census data and GIS software.
3. Compare new service benefits.
  - a. For Criteria A: if the new service area has 20% less minority or low-income populations than the original service area, then there may be an adverse impact.
  - b. For Criteria B through E, group the routes by classification and find the cumulative percent changes for revenue hours and miles between minority/non-minority and low-income/non-low-income. Compare the percent changes in revenue hours and miles between the minority and income classifications.
    - i. If Title VI specified populations see less than 80% of the cumulative benefits for their counterpart populations, then there may be an adverse impact.
    - ii. If Title VI specified populations see a reduction in service that is greater than 20% compared to what their counterpart population lost, then there may be an adverse impact.
  - c. If there is an adverse impact, then DDOT staff must do at least one of the following before proceeding to the next step:
4. Change the original proposal to add benefits or reduce service losses to the specified populations.
  - a. Mitigate any reductions with alternatives.
  - b. Provide justification as to why the proposal is the fairest option or the best one available.
5. If there is no adverse impact, then proceed to the next step
6. Submit the analysis for approval.

### *Equity Analysis - Definitions*

Due to Metro Detroit's unique racial and economic makeup, the percent of minorities and the percent of people living under the poverty line are higher than the national average. 75% of DDOT's service area population are minorities and 22% are low-income. The analysis used ArcMap for Desktop, American Community Survey 2016 population characteristics data, and TIGER 2018 block groups.

This methodology relies on these definitions:

- **Service area** – The service area for this analysis is any block group with a centroid within a half-mile of a stop, or intersect DDOT stops with a search distance of 60 meters to account for street width.
- **Minority population** – Minority counts are based on all individuals classified not as "white only" for race in the ACS 2016 block group data. This methodology does not

account for the large concentration of Arab populations in Southwest Detroit and Dearborn who have historically counted as “white” in the census.

- **Low-income population** – Low-income counts are based on all individuals classified as below poverty for income in the 2016 ACS block group data.
- **Minority and low-income averages** – The total minority population and the total low-income population are each divided by the total population in the system service area to find the system average. The population characteristics are based on ACS 2016 data. The minority average is 80% and the low-income average is 38%.
- **Minority route** – A route that has at least 1/3 (33%) of its total revenue mileage in census blocks, block groups, or traffic analysis zone(s) with a percentage of minority population that exceeds the system wide average. DDOT uses block group level data.
- **Low-income route** – The FTA defines this as a route that has at least 1/3 (33%) of its total revenue mileage in census blocks, block groups, or traffic analysis zone(s) with a percentage of below-poverty population that exceeds the system wide average. DDOT uses block group level data.
- **Disparate impact** – Refers to a neutral policy or practice that disproportionately affects members of a group identified by race, color, or national origin, where the recipient’s policy or practice lacks a substantial legitimate justification and where there exists one or more alternatives that would serve the same legitimate objectives but with less disproportionate effect on the basis of race, color, or national origin.
- **Disproportionate burden** – Refers to a neutral policy or practice that disproportionately affects low-income populations more than non-low-income populations. A finding of disproportionate burden requires the recipient to evaluate alternatives and mitigate burdens where practicable.

### **Disparate Impact Policy**

A major service change to the bus system will be deemed to have a disparate impact on minority populations if 20% or more of the affected service falls in census block groups with minority populations higher than the DDOT service area average.

### **Disproportionate Burden Policy**

A major service change to the bus system will be deemed to have a disproportionate burden if 20% or more of a service reduction falls in census block groups with low-income populations higher than the DDOT service area average.

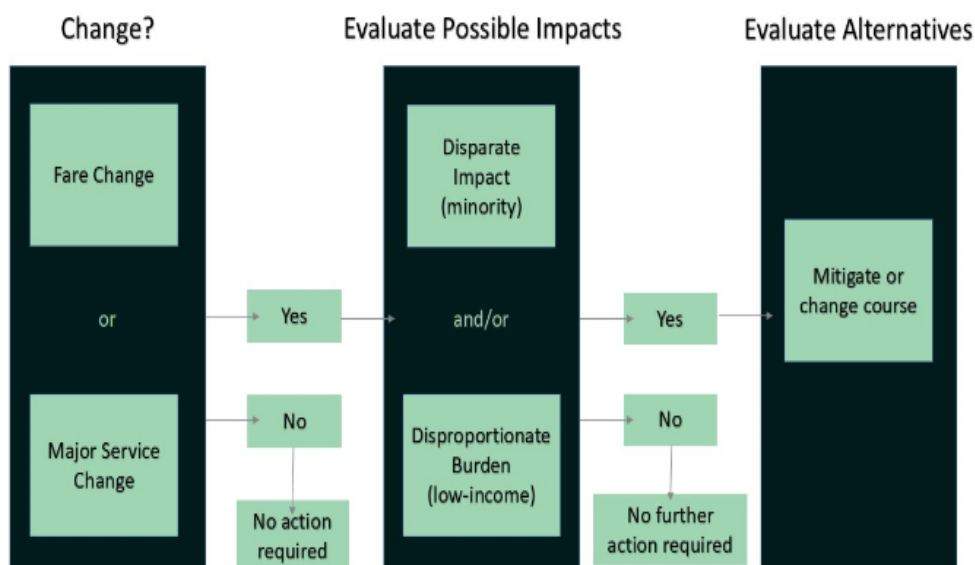

In any instance where the service change reaches or exceeds 20%, staff conducts an equity analysis.

Most census block groups in DDOT’s service areas are low-income and/or minority; as such, the transit routes that serve these areas are often classified as low-income and/or minority. As part of a commitment to fair, equitable and accessible service planning, staff may conduct an equity analysis even when the change does *not* reach the 20% threshold.

### Disparate Impact and Disproportionate Burden Evaluation

The impact on these vulnerable populations should be no less than 20% of the impact on non-vulnerable populations. For example, if the percent change in improved service for non-protected populations is 100%, the percent change for protected populations should be no less than 80%. If the percent of change for vulnerable populations is less than the threshold, there may be a disparate impact or disproportionate burden. If either occur, DDOT must present legitimate justification, and mitigation efforts, and discuss alternatives that were not pursued.

**Table 8 – Disparate Impact and Disproportionate Burden Evaluation**

### Fare Equity Analysis Procedure

A fare equity analysis/evaluation will be conducted whenever DDOT implements a fare change, regardless of the amount of increase or decrease. A fare change includes system-wide fare changes, a change on certain routes and/or a change to fare payment type or fare media.

Promotional fare programs are not subject to a fare equity analysis/evaluation. Such instances may include:

- Clean air promotions, where a local governmental entity or DDOT itself makes free fare available for all riders;
- Temporary fare reductions that are mitigating measures for other actions, such as construction activities that close a segment of the bus system;
- Promotional fare reductions that last less than 60 months.

### **Public Engagement Process for Major Service Change Policy**

To satisfy the public participation process requirement for the Service and Fare Equity Policy, DDOT staff will host an event on October 7, 2020. DDOT invited members of local community groups focused on the interests of minority and low-income populations to learn more about the proposed policies and discuss any questions or concerns with DDOT staff. In addition, a written comment period is scheduled for October 8, 2020, to October 23, 2020, for attendees to submit comments regarding the proposed policy to DDOT staff via electronic mail or U.S. Mail.

## Approval Signature Page

### Service Standard Approval Signature Page

I have received, considered, and approve the Detroit Department of Transportation 2021-2023 Service Standards Plan and Policies.

---

C. Mikel Oglesby, Executive Director of Transit

Date

# Results of Service and Fare Equity Analyses Conducted 2018-2020

## 2018 Fare Equity Analysis

DDOT simplified its fare structure by implementing a fare increase for the fixed-route bus service, decreased the reduced fare for Medicare recipients and students, eliminated transfers, changed period passes to rolling passes, and introduced a 4-hour ticket, 24-hour pass, and new mobile fare payment option.

The analysis found that the proposed changes did not create a disparate impact on the minority population. Neither did it create a disproportionate burden for the low-income population. Therefore, DDOT implemented the new fare structure to help improve the transit rider's experience in the City of Detroit. The full analysis is found in [Appendix I](#).

## January 2019 Service Change Equity Analysis

The analysis found the service changes affected routes, 13-Conner and 68-Chalmers. The changes reached or surpassed the major service change threshold of 25%. Route 99-Fresh Wagon (Eastern Market) is seasonal bus service that operated April to January and did not warrant an analysis. The full analysis is found in [Appendix J](#).

## June 2019 Service Change Equity Analysis

The analysis found the service changes to 10-Greenfield, 11-Clairmount and 16-Dexter had no disparate impact or disproportionate burden on minority or low-income population. However, a disparate impact or disproportionate burden was found on the minority or low-income populations for the service elimination of 99-Fresh Wagon. To mitigate the disparate impact and disproportionate burden on minority or low-income populations, alternate established service routes 8-Gratiot and 31-Mack were identified as alternate routes that can take riders directly to Eastern Market. The full analysis is found in [Appendix K](#).

## November 2019 Service Change Equity Analysis

The analysis found that of the five affected routes, 11-Clairmount and 26-Junction reached or surpassed the major service change threshold of 25%. However, both 11-Clairmount and 26-Junction are classified as both minority and low-income. Therefore, any increase in service benefits those populations and do not create a disparate impact or disproportionate burden for either according to the FTA Title VI requirements. The full analysis is found in [Appendix L](#).

## September 2019 Amenities Equity Analysis

All shelter sites will get new structures. Sixteen (16) of the 58 sites already have structures and the benefit to riders will not change by much. However, 42 sites will get new shelters, giving riders who use those stops a significantly better experience. Minority and low-income

populations will receive the most benefit from this program; 88% to 90% of the stops serve those protected populations, respectively. The full analysis is found in [Appendix M](#).

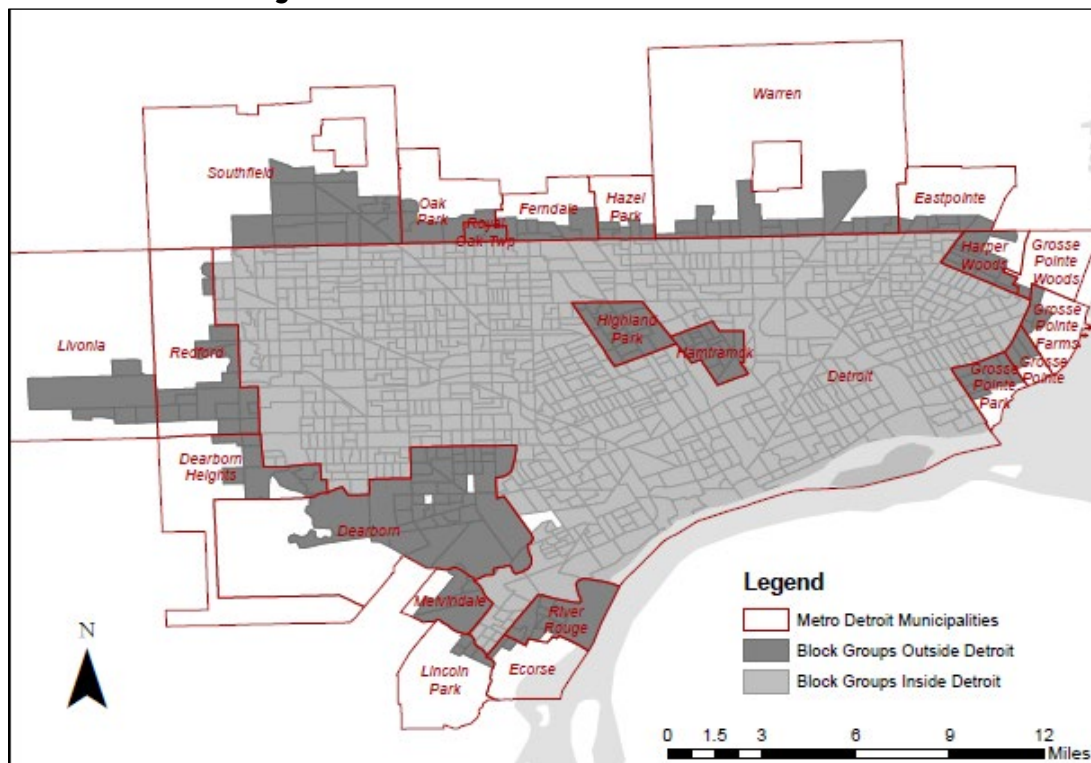

In conclusion, DDOT's new ad shelter program does not impose a disparate impact or disproportionate burden on the FTA Title VI protected populations. The new and updated shelters will enhance the transit experience of those populations who use the ad-funded bus stops. By trading ad space for shelter maintenance, DDOT hopes to lessen the costs of bus stop maintenance and improve the user experience.

## Demographic and Service Profile Maps and Charts

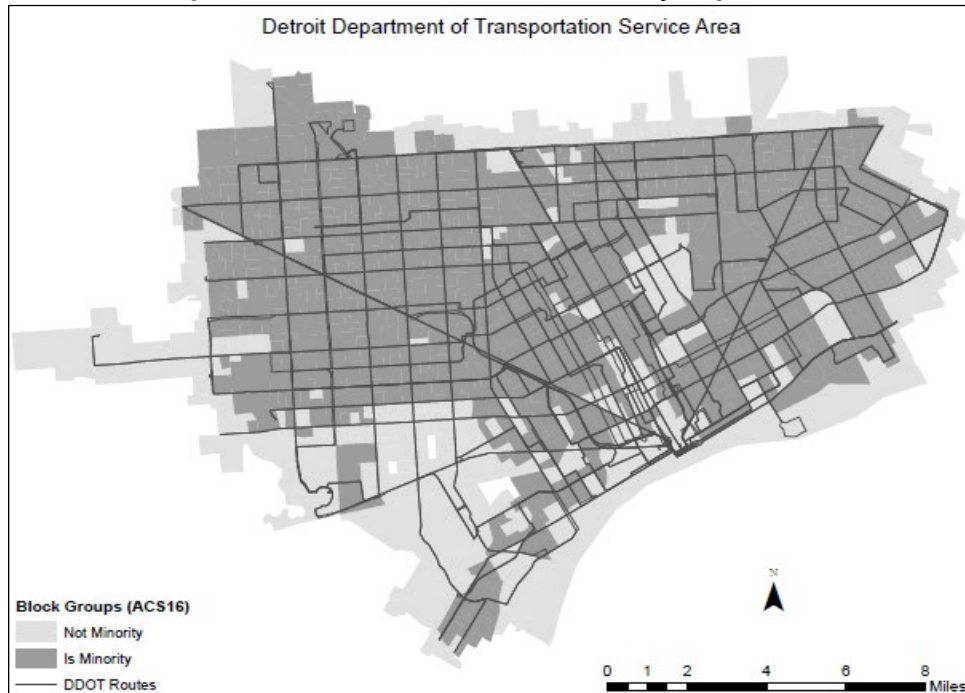

DDOT regularly evaluates demographic information as part of any proposed service or fare change, as required by the FTA. In addition, DDOT conducted an additional analysis using Census data for this program submission.

DDOT's Service profile maps based on 2010 census tract data and American Community Survey (ACS) 2016 census tract data are used to examine the extent of transit service available to minority and low-income populations within the DDOT service area (Figure 15-17). Maps displaying the geographic coverage of transit service in relation to the census tracts identified as minority and non-minority and low income and non-low-income level populations based on the service area threshold can be found in maps below.

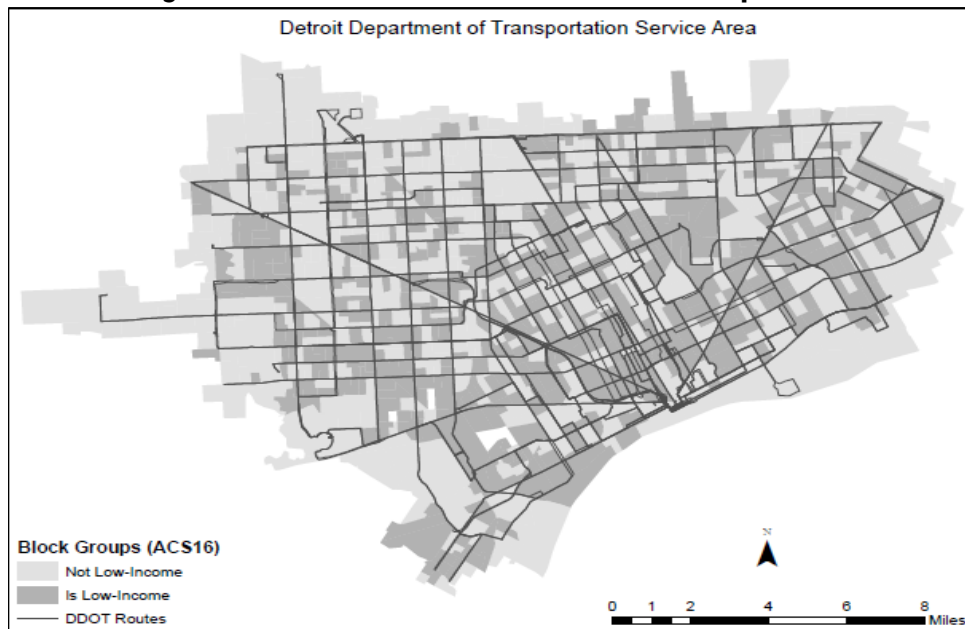

**Figure 15 – DDOT Service Area in Metro Detroit**

**Figure 16 – DDOT Service Area Minority Population**

**Figure 17 – DDOT Service Area Low-Income Population**

## Demographic Ridership and Travel Patterns, Collected by Surveys

DDOT conducted an On-Board Ridership Survey in September 2018 ([Appendix F](#)). The charts below characterize the demographics of the entire service area. Additional surveys may be conducted prior to a major service or fare change.

RACE OR ETHNICITY	
Black or African American	86%

### Transit Service Monitoring Program Report & Governing Entity Approval

DDOT's service standards and policies provide benchmarks to ensure that service design and operations practices do not result in discrimination on basis of race, color, or national origin. DDOT performs on-going monitoring and evaluation of the existing service. Results of service monitoring will be submitted triennially (in conjunction with the Title VI Program Update submission to the FTA.) In accordance with FTA Circular 4702.1B, the Service Monitoring Report must be reviewed and approved by the Executive Director, and included in the next Title VI Program update.

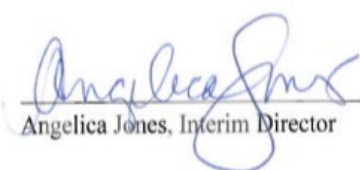

[Appendix H](#) summarizes the 2019 Service Monitoring results. No disparate impacts on minority populations were identified during the evaluation.

## Approval Signature Page

### Transit Service Monitoring Approval Signature Page

DDOT's Executive Director approved the 2019 Service Standards Monitoring Results. Figure 1 is the approval signature page for DDOT's 2019 Title VI Program.

**Figure 1 –2019 Service Standards Monitoring Results**

<p><b>Service Standards Monitoring Results Executive Approval</b></p> <p>FTA requires transit providers that operate 50 or more fixed route vehicles in peak service and are located in urbanized areas (UZA) of 200,000 or more people, or that otherwise meet the threshold defined in FTA Circular 4702.1B, to monitor their service standards and policies.</p> <p>Service standards and policies provide the framework for monitoring and assessment of service to compare service provided in areas with a percentage of minority populations that exceeds the percentage of minority populations in the service area to service provided in areas with a percentage of minority populations that is below the percentage of minority population in the service area.</p> <p>The regulation also states, "Transit providers shall brief and obtain approval from the transit providers' policy-making officials, generally the Board of Directors or appropriate governing entity responsible for policy decisions regarding the results of the monitoring program".</p> <p>DDOT conducted an assessment of its service standards compared to service provided in October 2019. The assessment found that there was no disparate impact to minority populations in any of DDOT's current service standards and policies. This service standard monitoring report is submitted for your consideration, awareness, and approval.</p> <p>I, the Detroit Department of Transportation Director, hereby acknowledge the receipt and approve DDOT's 2019 Title VI Service Standards Monitoring Results Report.</p> <div> _____ Angelica Jones, Interim Director</div> <div><u>11-4-2019</u> _____ Date</div>

**RE: TITLE VI PROGRAM PLAN**

The Detroit Department of Transportation (DDOT) is committed to ensuring that no person is excluded from participation in or denied the benefits of its services on the basis of race, color, or national origin, as provided by Title VI of the Civil Rights Act of 1964, as amended. Toward this end, it is the objective of all DDOT employees to:

- Ensure that the level and quality of transportation service is provided without regard to race, color, or national origin;
- Identify and address, as appropriate, disproportionately high and adverse human health and environmental effects, including social and economic effects of programs and activities on minority populations and low income populations;
- Promote the full and fair participation of all affected populations in transportation decision making;
- Prevent the denial, reduction, or delay in benefits related to programs and activities that benefit minority populations or low-income populations;
- Ensure meaningful access to programs and activities by persons with limited English proficiency.

All employees share the responsibility for carrying out DDOT's commitment to Title VI. The Title VI Coordinator is responsible for the day-to-day operation of the program and receives and investigates Title VI complaints that come through the complaint procedures process. For additional information on DDOT's nondiscrimination obligations, please email to: [DDOT-Title6@detroitmi.gov](mailto:DDOT-Title6@detroitmi.gov). DDOT is committed to a policy of non-discrimination in the conduct of its business, including its Title VI responsibilities and to the delivery of equitable and accessible transportation services.
