## COVID-19 WASTEWATER MONITORING

Wastewater monitoring shows 64% of sampling sites have detectable levels and 50% of sites have high levels of SARS-CoV-2 markers as of 01/15/2024 in the city of Detroit.

- The proportions are out of 22 sites across the city of Detroit from which wastewater samples are taken and tested for SARS-CoV-2 markers. Each sampling site represents a specific population based on the area its sewer shed covers, such as long-term care facilities, college dormitories, and entire ZIP code areas. Detectable levels are over 1000 copies/100mL; high levels are over 5000 copies/100mL.
