

Water & Sewerage
Department

You are invited to a community meeting hosted by the Detroit Water & Sewerage Department (DWSD) for the East Side Stormwater Resiliency Planning Study

What is the Meeting About?

The Detroit Water and Sewerage Department (DWSD) and project team will provide an update on the planning study that is underway to assess possible solutions to manage stormwater on Detroit's east side. The study is focusing on strategies to reduce basement backups and street flooding while creating community amenities, economic opportunities, and improving the water quality of Fox Creek and the surrounding habitat.

Attendees will have the opportunity provide input on current considerations and ask questions.

Multiple meeting options are available. The presentation and engagement questions will be the same for all three meetings.

Meeting Options

Wednesday, May 21 at 6 p.m.
Eastside Community Network (ECN)
4401 Conner St.

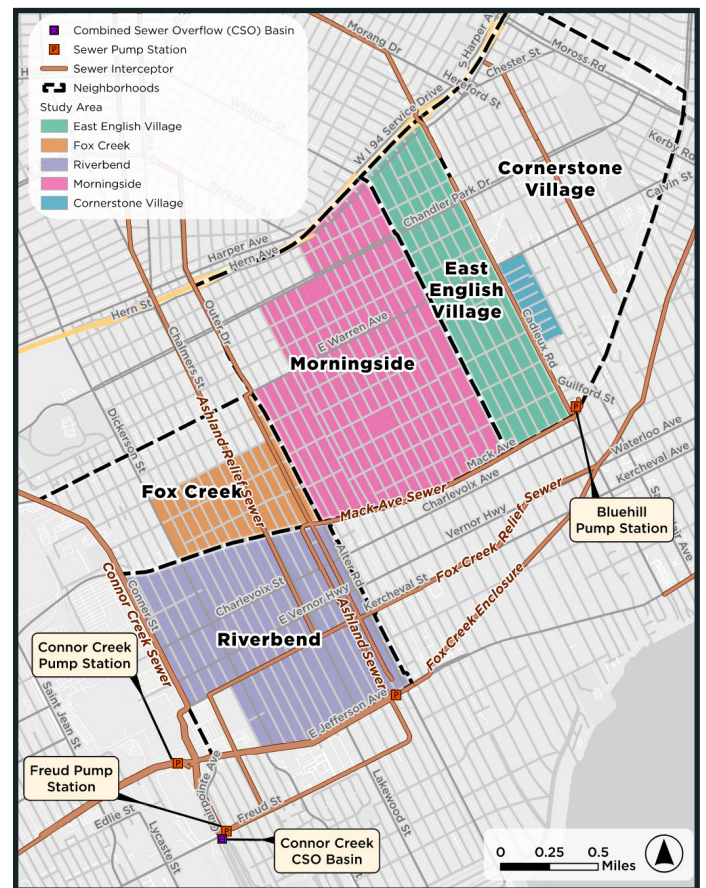

Thursday, May 29 at 6 p.m.
