FALL CLEAN-UP FIRE SAFETY

Dry leaves and yard debris can create fire hazards around your home. Take a few minutes to protect your property and your neighborhood.

Don't burn leaves or yard waste without a City of Detroit open-burn permit. Only clean wood may be burned in a commercially sold fire pit, per the city code.

HOW TO PROTECT YOUR HOME

1. Clear the first 5 feet
Remove dry leaves, dead vegetation and other combustible debris from near your home's foundation.

2. Clean roofs and gutters
Remove leaves and pine needles that could ignite from windblown embers.

3. Keep debris away from heat sources
Move leaves and branches away from your home, grills, fire pits, heaters and HVAC equipment.

4. Handle outdoor equipment safely
Let equipment cool completelt before refueling. Keep hot equipment away from dry leaves.
