ARPA Allowable Use:

The proposed project is deemed an allowable use within the State and Local Fiscal Recovery Funds (SLFRF) compliance and reporting guidance expenditure category for Negative Economic Impacts (EC2).

Background Information:

Since 2017, United Community Housing Coalition (UCHC) developed and administered the program, providing homeownership to more than 1,300 Detroit residents. UCHC demonstrated an ability to effectively administer the program by increasing benefits and participation each year- until COVID legislation temporarily halted home foreclosures.

In 2017, UCHC purchased 80 occupied, tax foreclosed homes on behalf of their residents. 80 properties entered Make it Home; Among the 80, all were non-deed holder occupied properties. 77 Deeds/ Landlords have been provided; 3 properties on track to be paid in full this year. Average purchase price to the residents; \$4,910.

In 2018, UCHC purchased 519 occupied, foreclosed homes on behalf of their residents. 59 Properties entered Make it home; Among the 519, there were 178 owner-occupied homes and 314 non-deed holder occupied homes. 486 Deed/ Land contracts have been provided; 33 Properties on track to be paid in full this year. Average price to the residents was \$2,859. The owner- occupied properties were sold to their residents at a cost of \$1,000.
40 clients utilized repair programs (some engaging in more than one repair):
18 roofs fixed 8 main drains fixed 5 plumbing repairs 2 porch repairs
1 electrical repair 1 foundation repair 26 items procured through DTE

In 2019, UCHC purchased 557 occupied, foreclosed homes on behalf of their residents. 557 properties entered Make it Home; Among the 557, there were 159 owner-occupied homes and 398 non-deedholder occupied homes. 473 deeds/ land contracts have been provided.; 84 properties are on track to be paid in full in next twelve months; The average price was \$2,875. The owner occupied properties were sold to their residents at a cost of \$1,000.

In 2020, No Make it Home due to the property tax foreclosure moratorium.

In 2021, UCHC purchased 3 occupied, foreclosed; 3 properteis entered Make it Home 3 Deeds have been provided; Average purchase price was \$4,785. Approximately 230 residents are participating in Make it Home in 2022. The number is slightly less than previous years due to a court ordered moratorium on certain owner-occupied foreclosures.

Bid Information:

No bid: This is a sole source provider for the specific services and re a sub recipient provider through Housing & Revitalization Department (HRD).

Contract discussion continued on next page.

HOUSING & REVITALIZATION- *continued*:

6004888 100% ARPA Funding – To Provide Operational and Administrative Support for the Make it Home Program, a Foreclosure Prevention Program. – Contractor: United Community Housing Coalition – Location: 2727 Second Avenue, Suite 313, Detroit, MI 48201 – Contract Period: Upon City Council Approval through June 30, 2025 – Total Contract Amount: \$1,150,000.00.

Contract Details:

Vendor: **United Community Housing Coalition** Amount: **\$1,150,000.00** End Date: **June 30, 2025**

Services:

To provide operational and admin support for Make it Home. The only foreclosure prevention program that assists residents post-foreclosure become or retain ownership.

Make it Home Make It Home (MIH) is an affordable home purchase program that gives residents living in foreclosed homes the option to purchase their home before the foreclosure auction. United Community Housing Coalition (UCHC) partners with the City of Detroit to use the Right of First Refusal to assist residents living in foreclosed homes buy the home they're living in. The City of Detroit deeds the homes to UCHC. Residents who are financing via 0% interest loan with UCHC enter into a land contract. Once the home is paid for in full, UCHC deeds the home to the MIH participant. Right of First Refusal

The General Property Tax Act, Act 206 of 1893, section 211.78m grants the State the right of first refusal to purchase a foreclosed property from the foreclosing governmental unit for minimum bid. If the State elects not to purchase the property under its right of first refusal a city, village, township, or city authority may purchase the foreclosed property by paying the foreclosing governmental unit the minimum bid.

Property Tax Foreclosure Prevention Other activities related to property tax foreclosure prevention, resource referrals, and sustainable homeownership.

Program Administration:

Program Administration:

- **Develop program eligibility, enrollment process, and program documentation. ○ Submit annually to the City of Detroit for final approval.**

Services:

The vendor will provide a system with a turnkey vehicle analytics installation for intersections. Equipment will be installed at designated sites. The system will collect data on all vehicles traveling in all directions in the sites. Collected data will be immediately uploaded and available for authorized users. The system will provide authorized users will the ability to search, by way of illustration only, and not by way of limitation, vehicle make, vehicle model, vehicle body style, presence of racks, vehicle history, and or presence of bumper stickers. The equipment and the system will allow authorized users to search by geographic area. The vendor is responsible for utility coordination, providing data transmission, installation and mounting all equipment. The vendor will maintain the equipment and the system.

Motorola “L6Q Quick-Deploy LPR Camera System” The System consists of the Contractor’s “L6Q Quick-Deploy LPR Camera System” which is a deployable license plate recognition (LPR) camera system that will help the City capture critical investigative data and protect their citizens. It collects clear plate, make, model, color and speed data, in both light and dark conditions. The long-range, integrated infrared illumination and starlight sensor will enable the City to scan vehicles, even in darkness.

- Rapid Install, Rapid Insight - The System will be set up in a matter of minutes at almost any of the Sites, making it easy to quickly change areas of surveillance.
- Durability and Security - To protect against weather conditions, the Equipment meets IP67 requirements, and is NEMA4 compliant. The Equipment is tamper-proof design and paintable, removable shroud helps the technology to stay physically secure while blending in with its surroundings.
- Versatile Power Options - The Equipment includes a new, high-capacity, swappable internal battery along with solar and AC/DC direct line power options.
- Remote Management - Configuration and activation of the Equipment is established on Android or iOS smart phones using the Contractor’s “Mobile Companion” application. Motorola “L5F Fixed LPR Camera System”

Contract discussion continued on next page.

POLICE- *continued:*

6004555 100% ARPA Funding – To Provide License Plate Recognition Cameras for DPD Public Safety. – Contractor: Motorola Solutions, Inc. – Location: 1301 E Algonquin Road, Schaumburg, IL 60196 – Contract Period: Upon City Council Approval through June 30, 2026 – Total Contract Amount: \$5,000,000.00.

Services- *continued:*

The System will also include the Contractor’s “L5F Fixed LPR Camera System,” which captures clear images on high-speed, high-volume roadways. Up to 4 cameras can connect to the VLP Communications Box, the camera’s power source and image processor. The L5F Camera System is highly energy efficient, with a power consumption of 13 watts, comparable to an LED light bulb.

The System will include, at a minimum, the following functionality:

- Collect license plate, make and model information even on vehicles moving at the highest speeds and in the darkest conditions.
- Include a processor that supports up to four cameras scanning at up to 60 FPS each, ensuring no vehicle passes unseen.
- Provide flexibility so the City the System can be built to meet the City’s needs via a variety of camera options and high-powered processing.
- Stay functional and up to date under various weather conditions.

The System will provide: Investigative Data Analytics –

The System goes beyond alerting and searching with patented analytics, complete control over data retention, and broad sharing options. Radar-based triggering can be configured to capture vehicles moving at specific speed thresholds and directions of travel, focusing strictly on the data you’re interested in.

The System will also give the City the software needed to capture and manage critical evidentiary data.

The System seamlessly connects with Vigilant PlateSearch, the Vendor’s LPR software that uses patented vehicle location analytics and accesses data obtained from billions of nationwide detections. By using “Vigilant PlateSearch” function of the System, the City will gain access to a vast database of evidence to assist in investigations.

The System’s Vigilant PlateSearch uses a vast database of plate detection data, as well as powerful search, analytic, and data management tools to turn those detections into leads. With precise investigative tools and access to a database containing information from billions of detections, the System will allow DPD to be able to quickly solve investigations and make their community safer. Searching and Analytics

The System is equipped with powerful search and analytic tools to find, track, and analyze vehicles of interest.

The System will provide:

- a. Intuitive Plate Searching - Users can search for complete and partial plate numbers and add them to hotlists that will send alerts when a matching plate is detected. **Users can also access historical data to find where the plate has been previously spotted and use that data to track that vehicle’s typical routes.**
- b. Easily Narrowed Results - Vehicle year, make, and model search filters can be used to narrow down a large number of vehicles to a manageable subset.
- c. Associate & Convoy Vehicle Analysis - Associate and convoy analysis function of the System will enable the City to identify vehicles that are connected to vehicles of interest. This will give the City more opportunities to generate leads using information they find during an investigation.
- d. Location Analysis – The location analysis function of the System will allow users to acquire information about the position of suspicious vehicles. The location analysis function of the System will allow the City to determine its most probable locations, with dates and times. Addresses can also be paired to vehicles, helping to focus on where a crime took place. This data can be compared to historical LPR data to determine what, if any, vehicles were at a location during the time a crime occurred.

Flexible and Secure Data Management The System will help organize and maintain data in a way that fits the City’s needs. The System’s data management capabilities supports the following management features:

- a. Flexible Data Retention - A configurable data retention policy preserves data for as long as it’s needed to close a case and to meet state and local data retention requirements.
- b. Industry Standard Security - A Criminal Justice Information Services (CJIS) compliant Security Policy provides industry standard quality of physical security, redundancy, access control, audit functionality, encryption of data, and compliance regulation. Shared Law Enforcement Data The System provides data retention is customizable.

POLICE- *continued:*

6004555 100% ARPA Funding – To Provide License Plate Recognition Cameras for DPD Public Safety. – Contractor: Motorola Solutions, Inc. – Location: 1301 E Algonquin Road, Schaumburg, IL 60196 – Contract Period: Upon City Council Approval through June 30, 2026 – Total Contract Amount: \$5,000,000.00.

Services- *continued:*

The System will allow DPD to set retention length to match its standard operating procedures, local ordinances, and community guidelines.

Retention can be set to any length of time, ranging from instant deletion after the capture to indefinite storage.

The System will include Vigilant PlateSearch which will allow DPD to share LPR data with over 2,000 other agencies on the network. This enables cameras to detect vehicles from multiple agency hotlists.

The System also offers Commercial Data, separately available for purchase, which includes data collected by third-party collected by third-party vehicles actively searching for plates received from financial institutions, like the Bank Asset Recovery industry, and vehicle manufacturers. Commercial Data feeds into Vigilant PlateSearch and Target Alert Service (TAS) part of the System will enable the System to flag vehicles more effectively.

Equipment Mounting and Installation: The Vendor shall install the Equipment as follows:

1. Cameras will be mounted between 8 and 12 feet above the ground to prevent easy ground access.
2. Solar panel will be installed facing south to provide optimal charging capability
3. Cameras will not be mounted directly behind solar panel. If mounted on the same pole, the camera will be installed below or above the solar panel.
4. The Contractor will leave a drip loop on all cables. City-Provided Equipment. Any computers used in connection with the Equipment or System that are not provided by the Vendor (“City-Provided Equipment”).

The City will be responsible, at its sole cost and expense, for providing and maintaining the City-Provided Equipment in good working order. The City represents and warrants that it has all rights to permit the Vendor to access and use the applicable City-Provided Equipment to provide the Equipment, System and Services under this Contract, and such access and use will not violate any laws or infringe any third-party rights (including intellectual property rights).

The City (and not Motorola) will be responsible for City-Provided Equipment, and the City will promptly notify the Vendor of any City-Provided Equipment damage, loss, change, or theft that may impact the Vendor’s ability to provide the Equipment, System and Services under this Contract, and the City acknowledges that any such events may result in an amendment to this Contract.

The vendor will provide the City with a “no fault” Equipment warranty. “No-Fault Warranty” means no additional cost to the City, the Contractor will, repair or replace Equipment components or parts that render the Equipment unable to perform its intended purpose. Within 48 hours of notice of a malfunction, the vendor shall provide the City with a response, including a plan and timeline to address the repair or replacement of non-functioning Equipment.

Warranty Exclusions. Motorola will provide a No-fault Warranty to City for such Equipment that extends until the end of the Warranty Period applicable to such Equipment; except that the No fault Warranty will not apply to: (i) any Equipment with intentionally altered or removed serial numbers, (ii) defects in or damage to Equipment resulting from use other than in the normal, authorized manner, or from accident, liquids (excluding naturally occurring precipitation), or neglect, (iii) testing, maintenance, repair, installation, or modification by parties other than Motorola, (iv) Customer or any Authorized User’s failure to comply with industry and OSHA or other legal standards, (v) normal wear and tear, (vi) cosmetic damage that does not affect operation, (vii) freight to the repair depot, (viii) issues or obsolescence of software due to changes in Customer or Authorized User requirements, systems, or equipment (ix) any Equipment that was changed, modified, or repaired by Customer or any third party, (x) tracking or location-based services, or (xi) beta services.

Site Requirements

- a. **Sites: The Equipment will be installed at locations determined by the City during project implementation. b. Access to Sites.**
- b. **The City will be responsible for providing all necessary permits, licenses, and other approvals necessary for the installation and use of the Equipment and the performance of the Services at each applicable Site, including for the vendor to perform its obligations hereunder, and for facilitating the Vendor’s access to the Sites. No waivers of liability will be imposed on the Vendor or its subcontractors by the City or others at City facilities or other Sites, but if and to the extent any such waivers are imposed, the Parties agree such waivers are void.**
- c. **Site Conditions.**
 - 1- **The City will ensure that (a) all Sites are safe and secure.**
 - 2- **Site conditions meet all applicable industry and legal standards (including standards promulgated by OSHA or other governmental or regulatory bodies)**
 - 3- **to the extent applicable, Sites have adequate physical space, air conditioning, and other environmental conditions, electrical power outlets, distribution, equipment, connections, and telephone or other communication lines (including modem access and interfacing networking capabilities), and**
 - 4- **Sites are suitable for the installation, use, and maintenance of the Equipment and Services.**
- d. **Site Issues. The Vendor will have the right at any time to inspect the Sites and advise the City of any deficiencies or non-conformities with the requirements of this contract. Vendor or City identifies any deficiencies or non-conformities, City will promptly remediate such issues, or the Parties will select a replacement Site. If a Party determines that a Site identified is not acceptable or desired, the Parties will cooperate to investigate the conditions and select a replacement Site or otherwise adjust the installation plans and specifications as necessary. A change in Site or adjustment to the installation plans and specifications may cause a change in the Fees or performance schedule under this Contract.**
