Meeting ID: 880 9360 0136

Dial in: (301)715-8592

PROPOSAL SUMMARY

Office of Mobility Innovation has received a Federal USDOT SMART grant (\$200,000 Software - \$270,000 Crash Mitigation) that aims to reduce traffic fatalities and improve transportation safety and efficiency in Historically Disadvantaged Communities (HDCs) by implement a limited-scope system for Detroit focusing on Mobility Optimization through Data for Equity and Safety (MODES). By applying upgrades at a few existing signalized intersections with real-time smart analytics, the goal is to: swiftly identify crashes, improve incident management and intervention effectiveness, and allow the City and community to make better equitable data-driven safety decisions together.
