Not black, not iron

October 27, 2017
Nadeen S

I am extremely disappointed in this item (I bought 3 of this size and two larger). First and foremost THESE ARE NOT BLACK! They are gray with black splotches. THESE ARE NOT IRON! They are typical light metal used for outdoor lighting. There is nothing special about these at all.

Response from Lamps Plus

October 31, 2017
Stacy M. Staff

Hi Nadeen S., thank you for the feedback. We looked into this, and found that the fixture's finish is indeed gray with black specks, and that the item is made of steel. The "black iron" previously was meant to describe the finish color tone, but we can see how that may have been unclear so we are updating our description online to state the steel construction and new finish name. Sorry for any trouble this may have caused you - we appreciate your feedback so that we can make our listings more clear.

Great light

Ordered two of these for my front porch. I was worried about the other reviewer that said they were more gray than black, but I loved the design and figured I could spray paint them if necessary. I didn't end up having to do that because they are 95% black in my opinion. In this photo the light is right next to my solid black mailbox and you can't tell a difference.
