Re: 14 Windows on Front Elevation of property

Historic District Commission,

On June 9, 2021 the Sherwood Forest Board of Directors approved my request for the replacement of the windows on the front elevation of my home. Our home is a 2 Story Colonial built between 1935-1940. In the June 14, 2017 meeting the Board of commissioners approved the installation of approximately 44 windows that were completed by Genex Window factory.

The windows in my home are over 80 years old and in need of being replaced. When I open them there is a problem getting them closed because of the condition of the windows and I think that replacing the front elevation with the same style and material of the other windows would be in line with the architectural features of the old windows while protecting the Integrity of the Historic District.. Also, they are single pane with no storm windows. I am humbly asking the Board to approve the Certificate of Appropriateness, using the same quality of windows that was approved for the 44 windows.

Genex Window will use U-PVC double Pane Insulated Low-E Argon, to Michigan Building\Energy Code (No Plastic).

Attached is the estimate from Genex Window factory company.

A handwritten signature in cursive script that reads "Bryant Harris". The signature is written in dark ink on a white background.

Thanking you in advance for your consideration in this matter.
