Hey Jennifer please see below for the dropbox link to the high resolution renderings of the development. There are two material options. The first is the original Sandstone (can be either Autumn Brown or Desert beige and I am dropping off both samples and Cedar Nichiha siding product as proposed. The second is the Nichiha novenary opal (<https://www.nichiha.com/product/novenary>) and redwood if theres any issues with the sandstone we proposed. I will be dropping off samples of all of these items this morning as well as adding additional photos. The building across the street actually has painted limestone block as their skirting base so I still think the sandstone is more than appropriate. Any questions please feel free to let me know.

Hi Carlo,

Thanks for the heads up. Historic staff works in the office on Tuesdays and Weds each week so Alex can stop by (CAYMC, Suite 808) to drop off the materials either day. He can also brick the materials to the meeting (5/10/2023) if you all plan on attending in person.

Regards,

Jennifer

Hi Jennifer. I'm out of town until next week but Alex has material samples he'd like to drop off to you, what's the best way for him to do so? He's copied on this email

Thanks

Hi Carlo,

Please see the attached. Note that the Commission will commence their review of the project at the next/May 10, 2023 regularly scheduled meeting per the attached. Feel free to let me know if you have any questions.

Thanks,

Jennifer
