Good morning Mollie, please see link below to give a better idea on sizes.

[The Belden Brick Company | Brick Dimensions | Brick Sizes](#)

At current, we do not have any Madrid available in a standard size. We can likely come up with the small quantity you need in a MODULAR size. Standard size are only available for special production orders. The minimum order quantity for standard size is typically between 10,000 and 30,000 pcs pending on the color and manufacturer. Manufacturers are phasing out standard size brick.

We may be able to get 470-479 light range in standard size if we can get an order together soon but the current climate of the brick market doesn't really allow for lengthy approval processes and "picky-eaters"..

If approval extends much longer we will likely not have anything in ANY size to offer that matches the color of this building.

I hope this is somehow helpful, and not discouraging! I really am an advocate for brick! (not so much politics)

Thank you,

Gary Tenney
