GENERAL

1. DESCRIPTION OF EXISTING CONDITION

Please tell us about the current appearance and conditions of the areas you want to change. You may use a few sentences or attach a separate prepared document on the right. (For example, "existing roof on my garage is covered in gray asphalt shingles in poor condition.")

House and garage roof is new (installed 6 months ago) (Timberline Natural Shadow Charcoal Architectural Shingles)
Existing house and garage walls have exterior sheathing only. (no siding or brick installed)
Existing Mansory front Porch is in decent shape. Existing rear wood porch is new construction.
Existing garage gable have wood siding in poor shape. Existing wood balconies are new construction.
Basement block windows are new construction. House Windows are not installed, only framed openings.
Existing wood soffits boards and Fascias have warped due the water and are in poor shape.
Existing chain link fence is falling apart, and it is very poor condition. Concrete driveway is in decent shape.

2. PHOTOGRAPHS

Help us understand your project. Please attach photographs of all areas where work is proposed.

3. DESCRIPTION OF PROJECT

In this box, tell us about what you want to do at the areas described above in box #1. (For example, Install new asphalt shingle roofing at garage.)

Install New brick chimney. Install new wood brackets, wood Fascias and wood soffits. Install new wood brackets
Install new Westchester double hung windows (wood frame/alum clad) (contractor submit application for permit)
Mansory front Porch to be renovated, rear wood porch and rear balcony to be painted.
Install new entry door with brick and stone detailing. Install new balcony metal railing. Install front bay window.
Install new cedar shake siding as shown at elevations. Install brick cladding over first floor exterior walls.
Site improvement: existing 6' chain link fence to be replaced. Clean site and removed bushes and debris.

4. DETAILED SCOPE OF WORK

In this box, please describe all steps necessary to complete the work described in box #3. (For example, "remove existing shingles, replace wood deck as necessary, replace wood eaves, install roof vents, replace rotted fascia boards, paint, clean worksite.")

Existing roof is new to remain. Existing front wood deck to be removed.
Existing window openings that were previously opened to be closed to follow original windows location and dimension.
Install new Westchester double hung windows. (contractor will be submit application for permit)
Brick piers and brick walls porch to be tuckpointed as required. Concrete landing to be repaired.
Existing garage wood siding on gable to be scraped, replace damaged pieces, primed and painted.
Install and paint new cedar shake siding as shown at elevations. Install brick cladding over first floor exterior walls.
New gutters, downspouts, soffits and fascia to be installed.

5. BROCHURES/CUT SHEETS

Please provide information on the products or materials you are proposing to install. For example, a brochure on the brand and color of the shingles proposed.

ADDITIONAL DETAILS

Beauty

HGI Entry Systems will add an element of beauty which will be enjoyed by you, the homeowner, as well as every visitor who comes to your door. Lovely stained and painted finishes will highlight the myriad of decorative glass and unique hardware options. Your new front door will add charm, curb appeal and value to your home.

Strength

All HGI Steel Entry Systems are built using an all-steel construction 22 gauge door which is 33% heavier than competitors doors for security and durability. All HGI FiberStar Entry Doors are constructed with state-of-the-art technology. Laminated composite rails and high impact skins yield outstanding strength and durability.

Safety

The safety of your home and family is always first. HGI doors offer such features as an 18 gauge steel frame, deadbolt, security plates and tempered safety glass. Our steel edge door has over ten times the strength of a wood edge door to protect against forced entry.

Energy Savings

HGI doors will insulate better than many walls with a R rating of 15.1. In layman's terms, our door is the best in the industry at keeping the inside in and the outside out. Windows and doors represent the biggest energy loss in most homes. Allow a beautiful HGI door to save you money.

HGI 101 : How To Build A Door

You are four easy steps away from a new entranceway for your home.

1

Select a HOME GUARD® door style from the 24 unique families of glass and doors styles.

2

Choose from our seventeen decorator colors or seven hand applied stain finishes for the inside and outside of your new entry door.

3

Select a knob, lever or handleset (even keyless!) from the many styles and finishes offered to compliment your door.

4

Add functionality with a peepsite, knocker, kickplate or magazine slot. Add strength and beauty with our exclusive HGI Cladwrap or Timberframe door frame options.

Lifetime & Beyond Warranty

Like the Amish artisans that live and work near the Home Guard factory in Grabill, Indiana, we too craft each door one at a time. We are proud to offer a Lifetime & Beyond Limited Warranty on All Home Guard Entry Doors. Our exclusive transferable warranty gives peace-of-mind protection against warping, delamination and twisting of door slab for as long as you own the door...and beyond. Please see our Warranty Card for details.

Roundtop Entry Doors

- 22 Gauge Steel
- Factory Steel Cap
- Replacement Frame or Timberframe® New Construction
- Beautiful renovations
- Wood grains to replace Wood doors
- Archtops are also available

HGI is proud to be one of a handful of manufacturers who have perfected the art of producing high quality roundtop and archtop entry doors. These beautiful and unique doors are made from 22 gauge steel and include a factory-installed steel cap. The HGI Roundtop door can be ordered as a replacement frame unit or as a Timberframe new construction unit. Our roundtops make a perfect, energy saving replacement for antiquated wood doors. Available in 17 baked-on color options or 7 beautiful woodgrain hand-stained finishes, these doors exude charisma and rustic charm, while maintaining modern operation, longevity and energy efficiency.

**Glass style available in round top only. Due to the size of the F17RT glass frame, there is a visible seam on the outer rail.*

Signature Series

Natural Fiberglass Grains

The beauty of natural wood, improved.

HGI's Signature Door Series features a patented grain technology process that authentically replicates any natural surface. The door process begins by hand, selecting the most desirable wood pieces which are then used to build a real wood door. A silicone casting accurately picks up the finest details of the wood grain which are transferred to the door mold using our Nickel Vapor Deposition Technology. The resulting mold is utilized to produce the fiber glass skin of each Signature Series door. The result is a breathtaking reproduction with random grain depths and all the natural characteristics of natural wood, but free from the warping, bowing, delamination and moisture issues that plague real wood doors. Born from real wood but vastly improved upon by state-of-the-art technology. The best of both worlds: HGI Signature Series Doors.

Available Stains

Colonial Oak Stain Shown on Oak Grain

Mahogany Stain shown on Mahogany Grain

Cherry Stain shown on Cherry Grain

Harvest Gold Stain shown on Cherry Grain

Exclusive Adjustable Frame

Every Signature Series Entry Door is equipped with HGI's exclusive, patented adjustable hinge plate system. The door hinge is adjustable both vertically and horizontally to deliver the perfect fit on the door frame. The result is superior ease of operation and an industry leading weatherseal against the elements. The bottom line: **increased energy savings.**

The Detail is our Signature

Pro Match Color System

Color and Stain Options

With our exclusive HGI Pro Match Color System, you can have an exact match between Entry Doors, Windows, Patio Doors, Clad Wrap and ten Solid Storm Door colors.

Most Home Guard steel and fiberglass entry doors are available in an optional embossed woodgrain for the ultimate wood look finish. All steel doors are zinc-galvanized, primed and painted with a baked-on, high quality exterior paint. Of course, all HGI doors come with our exclusive seven year finish warranty.

All colors marked "*" are Pro-Match colors.

7 Year Finish Warranty

The wood grain embossed doors can also be stained with one of our seven hand-rubbed finishes and sealed with Home Guard's exclusive GuardCoat.® Choose from one of the beautiful stains below or combine solid color on one side and stain on the other. Whichever you choose, your finish is backed by our exclusive 7 Year Finish Warranty.

Colors shown are reproduced by the lithographic process and may vary from actual color. Please ask your dealer for the official Home Guard Pro-Match Color Chart for a more accurate representation of color.

BALDWIN

Baldwin is about creating a signature look that seamlessly blends hardware with the personality of its owner. Backed by an industry leading limited 25-year finish warranty. Leave a lasting impression with Baldwin.

HISTORIC CHARM GOES MODERN

NEW WESTCHESTER
DOUBLE HUNG WINDOWS

SIERRA
PACIFIC
WINDOWS

AN UPGRADE TO A TRUE CLASSIC.

Cover Photo
Builder: Justin Fletcher Homes
Architect: Bruce Butler / By Design
Photographer: Irvin Serrano Photography

Thermally broken sash construction.

PG50 performance rating on most standard sizes.

0.28 U-value with dual insulated Lo-E 366 and argon.

Bottom sash tilt latch for easy cleaning.

60" x 108" maximum size for 1-3/4" sash.

WESTCHESTER DOUBLE HUNG WINDOWS

This Old House | 2019 Idea House | Nat Rea

The tireless work of our engineers and designers has paid off. Introducing our new Westchester Double Hung windows, a huge improvement to a classic look.

Designed to bring back the original charm of windows hand-crafted over a century ago, they offer narrower check-rail sightlines with updated structural and thermal performance. You'll also find many new patent pending innovations, including a traditionally styled combination sash lock.

The Westchester is crafted with fully clad exteriors using durable extruded aluminum.

A RARE COMBINATION OF CHARM AND TECHNOLOGY.

Innovating improvements to a timeless design, the Westchester is one of our highest performers, with structural and thermal performance ratings rarely found in the Double Hung market.

Yet each Westchester is built with historically accurate sash proportions, making it ideal for architecturally accurate renovations or for a touch of elegance in new construction projects.

Patent-pending sill end caps and drainage system.

Use for both residential and commercial applications.

Integral aluminum nail fin.

Patent-pending multi-point tilt latch.

Patent-pending traditionally styled combination sash lock.

Protected by CoreGuard® Plus wood preservative.

EXTERIORS DESIGNED TO LAST.

Clad exteriors are fully encased in low maintenance, heavy-duty, extruded aluminum that's at least twice as thick as roll-form cladding.

What's more, nearly all color finishes feature our environmentally friendly AAMA 2605 powder-coating, which leads the industry in durability and environmental safety. Our Textured Collection uses AAMA 2604 powder-coating to retain its rich texture.

As for colors? An industry-leading 75 choices along with some sensational textures allow you to add warmth, a bright splash or a new statement to your designs. We'll also custom match any color you choose.

Dreaming of a Home Redesign?

Get creative with the Atlas roof inspiration center. In the Roof & Home Design Studio, you can upload photos of your home and swipe for different looks. With the Visual Product Selector, you can explore Atlas shingle styles, features, and colors to help you visualize and choose the perfect roof for your home.

AtlasRoofing.com/Roof-Inspiration

The Problem

Over time, shingles without proper protection can develop unsightly black streaks caused by blue-green algae.

APPROVED PRODUCTS

The Solution

Atlas shingles featuring Scotchgard™ Protector fight algae and unsightly black streaks, keeping your roof looking newer, longer.

Life Is Messy — Your Roof Shouldn't Be

Your home is the biggest purchase you'll ever make, and the roof is the crowning touch. Choose Pinnacle® Pristine shingles with Scotchgard™ Protector by 3M™ to ensure your roof stays beautiful for years to come.

With more than 25 years of proven performance, Scotchgard™ Protector has been preserving the curb appeal of roofs across America. And because our shingles are approved by Mike Holmes, you can be sure you'll Roof it Right with Atlas Designer Shingles.

Backed by the Power of Scotchgard™

Scotchgard™ Protector by 3M™ is known for keeping everything from carpets to outdoor gear looking new longer. Atlas Shingles with Scotchgard™ Protector are the only shingles in the industry with a Limited Lifetime Warranty providing long-term protection against black streaks caused by blue-green algae.

Bigger, Faster, Better

A bigger shingle means better protection, faster installation, and stunning curb appeal.

The high performance shingle design in HP42® shingles provides more coverage due to a wider and taller format, displaying a greater exposure of our designer shingles.

Pinnacle® shingles with HP42® technology feature the Sweet Spot™ nailing area and double FASTAC® sealant line, ensuring your shingles will stay put for a more secure seal and enhanced wind protection up to 130 mph.

Replacing Your Roof Is a Big Decision — Atlas Makes It Easy

With Atlas Pinnacle® Pristine shingles you get the total package – unmatched protection against harsh weather and high winds, distinctive curb appeal and long-lasting beauty, all backed by one of the industry’s best warranties.

Peace of Mind

Don't worry. We've got you covered with the Atlas Lifetime Limited Warranty*, ensuring your investment is protected for years to come.

Wind Protection

Let those winds howl. Because of our innovative HP42® shingle technology, your roof is shielded from wind gusts up to 130 mph.

High-Performance

HP42® technology features a wide format for better curb appeal, plus our Sweet Spot™ nailing area and double FASTAC® sealant line ensure your shingles will stay put.

Class 3 Impact Resistance

UL 2218 Class 3 impact resistance rating offers protection against harsh weather conditions, keeping your home safe and secure.

To provide homeowners the most accurate representation of color options, several photo scans and house shots were utilized in numerous lighting conditions. Variations in lighting illustrate the color gradients on asphalt shingle roofs.

Color blends vary from shingle to shingle. Before installation, consult with your contractor and request to view the actual shingles being installed on your roof to ensure confidence in your final color selection.

Pinnacle® Pristine

High Performance Meets Lasting Beauty

Atlas Pinnacle® Pristine architectural shingles offer stunning color that lasts. With protection against damaging high winds and black streaks caused by algae, you're investing in a roofing system that has lasting curb appeal, and the peace of mind that comes with it.

THE CHARM OF YESTERDAY, CUSTOMIZED FOR TODAY.

Starting with a classic shape, we give you many ways to make Westchester your own. And all of them are constructed with the meticulous craftsmanship that makes this double hung window a lasting enhancement to any space.

SIMULATED DIVIDED LITE PROFILES

A classic look that's energy-efficient.

	5/8"	7/8"	1"	1-1/4"	2"
Contemporary Clad					
Putty Clad					
Traditional Clad					

Your Westchester grilles can add a look as unique as you like, from our standard traditional and contemporary configurations to your choice of custom designs.

HIGHLY ENGINEERED FOR BETTER PERFORMANCE.

The Westchester maintains higher air, water and structural capabilities and improved thermal ratings even as we engineered larger sash sizes.

Triple glazed windows with argon have a U-value as low as .17. Dual glazed reach a U-value of .28 with LoE-366 and argon. Performance numbers like these demonstrate the rigorous engineering standards and technology that are built into the re-imagining of this classically designed window.

CHOOSE GLAZING PERFECT FOR YOUR ENVIRONMENT.

Low-E 366

Cardinal's triple layer silver product for superior performance. 95% UV protection. Solar heat gain coefficient of 0.27.* Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 366

with i89 Coating**

The same superior performance as regular Low-E 366, but with the addition of i89 coating on the interior surface to increase insulating value and reduce solar heat gain. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 340

Cardinal's newest glazing innovation. It has an amazingly low 0.18* solar heat gain coefficient to keep out the heat even in the blazing sun. Slightly tinted. Blocks 98% of UV rays. Less heat gain when it's hot, less heat loss when it's cold, and the best glare control under the sun. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar

A very high (0.70*) solar heat gain coefficient. Ideal for reducing your heating bills in colder climates. Superior insulation value blocks cold and keeps in the heat. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Low-E 180 Passive Solar

with i89 Coating**

The same superior performance as regular Low-E 180, but with the addition of i89 coating on the interior surface to increase insulating value. Meets even the most extreme requirements in the majority of the Canadian Energy Star zones. Also available with Preserve® protective film or with Preserve and Neat® coating for a naturally cleaner glass when selecting XL Edge or Endur Spacer.

Dual Pane Low-E

Insulated for improved energy efficiency. Single surface Low-E coating to reduce solar heat gain and block UV rays.

Triple Pane Low-E

Available in a variety of Low-E coating combinations for superior insulation and energy performance.

Insulated Glass

For moderate climates. Basic glazing with basic performance.

Sound Control

Reduces outside noise by as much as 50% while blocking 99% of damaging UV rays. Laminated for shatter resistance. Available insulated or non-insulated.

*All values shown are center of glass. **Interior surface coatings, also known as surface #4, are applied to the interior (room-side surface) of a dual pane IG unit, resulting in improved thermal performance and lower heating costs. Because the coating reflects heat back into the room, the room-side pane of glass will be slightly colder in winter, causing a higher potential for interior condensation.

No-Metal TrueWarm® Edge Spacer.

THE ADVANTAGE OF NO-METAL SPACERS.

One of the technological advances that makes our Westchester windows perform so well are patented No-Metal TrueWarm® Edge spacers.

Many window manufacturers use aluminum spacers between their panes of glass. These conduct cold and heat, and that's not good for thermal performance.

Our no-metal warm edge spacers are 100% polymer structural foam, for excellent thermal performance and a superior seal.

ADD DECORATIVE GLASS.

Further customize your Westchester windows with tinted, patterned, obscure or other specialty glass. It's a smart choice for privacy, security or just design preference.

*Available on select products.

EXTERIOR TRIM PROFILES AS IMPRESSIVE AS THE WINDOWS.

The Westchester exterior trim profile system comes in four available styles that snap in place on the frame with a clip system. No through-frame anchors or excessive nail holes, leaving you an integrated frame that gives homeowners the flexibility to choose the aesthetic they want.

SEVERAL SCREEN CHOICES

Screens have an aluminum frame which matches the exterior clad color. You can choose your screen mesh, from standard fiberglass to the improved visibility and even smaller insect barrier of BetterVue® or UltraVue™.

Standard metal screen.

Standard

BETTERVUE
IMPROVED VISIBILITY INSECT SCREEN

ULTRAVUE
EXCELLENT VISIBILITY INSECT SCREEN

FLEXSCREEN

Hidden and beautifully simple, FlexScreen is the first screen of its kind made of flexible spring steel to fit firmly into screen tracks. No screen frames, no hardware, just refreshingly easy installation.

EARTH-FRIENDLY. MORE THAN AN APPROACH, AN OBLIGATION.

All materials in the production of Sierra Pacific windows and doors are highly valued and responsibly used. This includes the select wood that comes from over 2 million acres of forestland owned by our parent company, Sierra Pacific Industries. Thanks to advancements in “sustained yield” forest management and timber harvesting, we will nearly triple the amount of wood growing on our lands in the next 100 years.

Proposals Requiring Approval

- Removal and replacement of all remaining fascia boards.
 - Replaced with Common Pine Boards (non-specific manufacturing)
- Installation of aluminum clad over all newly installed fascia boards.
 - MFG: Quality Aluminum Products
- Removal and replacement of all remaining soffit boards.
 - Replaced with Common Pine Boards (non-specific manufacturing)
- Installation of aluminum soffits over all newly installed soffit boards.
 - MFG: Quality Aluminum Products
- Installation of new 3 Tab asphalt shingles
 - MFG: Isaiah Industries (Classic Metal Roofing Systems)
- Installation of new gutter system
 - MFG: Quality Aluminum Products

- Removal and replacement of all remaining fascia boards.
 - Existing fascia boards are completely weathered beyond repair, and have been warped due to water leaks,
 - New boards will also be installed where existing boards have rotted away entirely and are no longer present.
 - New gutter system cannot be attached to the existing boards as there is nothing left to screw into.

- Installation of aluminum clad over all newly installed fascia boards
 - **The remaining fascia boards have a poorly installed metal clad on them currently**
 - Wood boards must be maintained and painted over every few years to prevent decay. Properly installed aluminum clad does not require maintenance.
 - We propose the installation of new aluminum clad over all of the new fascia boards to ensure this does not need to be revisited for many years to come.

- Removal and replacement of all remaining soffit boards.
 - Existing boards are completely weathered beyond repair, and have been warped due to water leaks, cracked due to the immense weight of the clay roof, and many boards have mold on the back, inside of the attic.
 - Many boards are missing, with multiple holes having formed around the perimeter of the home allowing for birds to enter the attic.
 - New boards will also be installed where existing boards have rotted away entirely and are no longer present.

- Installation of aluminum clad over all newly installed soffit boards.
 - Wood boards must be maintained and painted over every few years to prevent decay.
 - We propose the installation of new aluminum clad over all of the new fascia boards to ensure this does not need to be revisited for many years to come.
