## BRIEF PROJECT DESCRIPTION:

New Construction of attached residential duplexes. Total of 14 units in two buildings.

## APPLICANT IDENTIFICATION

**TYPE OF APPLICANT:** Architect/Engineer/Consultant

**NAME:** steven craig flum

**COMPANY NAME:** Steven C. Flum, Inc.

**ADDRESS:** 3105 Holbrook

**CITY:** HAMTRAMCK

**STATE:** MI

**ZIP:** 48212

**PHONE:** +1 (313) 407-1318

**EMAIL:** SFLUM@STEVENCFUM.COM

## I AGREE TO AND AFFIRM THE FOLLOWING:

- ☒ I understand that the failure to upload all required documentation may result in extended review times for my project and/or a denied application.
- ☒ I understand that the review of this application by the Historic District Commission does not waive my responsibility to comply with any other applicable ordinances including obtaining appropriate permits (building, sign, etc.) or other department approvals prior to beginning the work.
- ☒ I hereby certify that the information on this application is true and correct. I certify that the proposed work is authorized by the owner of record and I have been authorized to make this application as the property owner(s) authorized agent.

## PROJECT DETAILS – TELL US ABOUT YOUR PROJECT

**Instructions: Add project details using the text box in each section. If your details exceed the space provided, attach the details via the attachment icon for that section.**

### ePLANS PERMIT NUMBER:

(only applicable if you've already applied for permits through ePLANS)

N/A

## GENERAL

### 1. DESCRIPTION OF EXISTING CONDITION

*Please tell us about the current appearance and conditions of the areas you want to change. You may use a few sentences or attach a separate prepared document on the right. (For example, "existing roof on my garage is covered in gray asphalt shingles in poor condition.")*

Attach is the Description of Existing Condition, Existing Site Plan with Photographs and Survey

### 2. PHOTOGRAPHS

*Help us understand your project. Please attach photographs of all areas where work is proposed.*

### 3. DESCRIPTION OF PROJECT

*In this box, tell us about what you want to do at the areas described above in box #1. (For example, "Install new asphalt shingle roofing at garage.")*

Attached is the Description of Project, Review of Elements of Design, Architectural Drawings and Renderings

### 4. DETAILED SCOPE OF WORK

*In this box, please describe all steps necessary to complete the work described in box #3. (For example, "remove existing shingles, replace wood deck as necessary, replace wood eaves, install roof vents, replace rotted fascia boards, paint, clean worksite.")*

Attached is the Detailed Scope of Work

### 5. BROCHURES/CUT SHEETS

*Please provide information on the products or materials you are proposing to install. For example, a brochure on the brand and color of the shingles proposed.*

**ADDITIONAL DETAILS**

## **DESCRIPTION OF EXISTING CONDITION**

The existing 20,000 square foot vacant lot located on a street corner with an alley to the rear. There is an existing adjacent three story brick single family residence to the west and two story townhouses to the north. The lot is covered with grass and no pavement. Refer to the Civil Survey Sheet and Architectural Existing Site Plan for additional photos of the site and demolition notes.

Previously the vacant parcel was a paved parking lot for the hospital that was across the street. The previous parking lot constitutes a hazard to the safety of the neighbors and public. Automotive fluids may have leaked into the soil from cars parked on the lot. Environmental Phase I and Phase II will need to be ordered and possibility remediation of the hazardous soil removed.

## VIRGINIA PARK TOWNES

### **DESCRIPTION OF PROJECT**

Create residential development consisting of three story duplexes that are attached in groups of two duplexes and five duplexes. The two buildings will have a total of 14 units. One building will face Virginia Park Ave. and the other building will face Third Ave. All the off street parking will be in the rear of the building. Attached garages will have 14 parking spaces and 5 parking spaces will be under carports.

The basis of the proposed design was taken from the Rosa Parks-Clairmount Neighborhood Revitalization Framework completed by the City of Detroit. The city's design was for the vacant lot across the street from the proposed development parcel. The city's design used a combination of townhomes facing Virginia Park Ave. and a multiple family structure on the corner and along Third Ave. Design elements that were used are the three story townhouse, raised stoop, taller than wide windows, the expression of brick and the front yard setback.

CONCEPTUAL VIEW OF ROWHOUSES ON VIRGINIA PARK AVE.

CONCEPTUAL PLAN OF DEVELOPMENT POTENTIAL VIRGINIA PARK AVE.

## Community and City of Detroit Review

The community supports the removal of the environmental hazard and the new construction of residential housing on the vacant parcel.

We met with the community and the city, made presentations, listen to feed back on the development. The following is an outline of steps we have taken to advance the project forward:

1. The original design was for a four story, 30 unit multi-family building.
2. The community and city's response to the proposed design was they were unwilling to offer support based on the building massing and the number of units.
3. New designs for the development were presented reducing the massing and number of units. There will be two smaller multi-family buildings, three story tall and only having 21 units. The project was submitted to the Historic District Commission in February 2025 and it was denied.
4. Continued meeting with the community and community representatives to reduce the number of units and changes the site and exterior design were made. The following are the changes to the site and building design:
  - The number of units has been decreased from 21 to 14 units. This was achieved by changing the stacked three-unit configuration to two-unit (duplex) configuration
  - The front yard setback on the Virginia Park building has been increased to 21'. This exceeding the zoning code minimum required front yard setback
  - The buildings footprint has decreased from the revised front yard setback. We also decreased the 3rd street building to match the other building
  - The lower "garden level" unit will have a garden patio and entry to the unit. The upper unit entry will be from the raised stoop previously shown
  - We have created an additional entrance to the parking area from the alley. We have also changed the two-way vehicular drive to a one-way direction
  - The zoning code review has been updated and we now only need 2 dimensional variances; Floor Area Ratio and the Recreational Space Requirement. Previously there were 5 dimensional variances being requested
  - The front entry roof design were changed from a cantilevered metal roof to a more traditional design that are found on Virginia Park Avenue

- The exterior façade colors were updated
- The casement and awning windows shown before were replaced with a more traditional single hung window

If the Historic District Commission finds that the development does not meet the Elements of Design. The developer request it to be reviewed under the Section 21-2-75 of the City of Detroit Zoning Ordinance, “Issuance of notice to proceed”. The two conditions that prevail are (1) the vacant parcel constitutes a hazard to the safety of the public or the neighborhood. (4) Retention of the vacant parcel would not be in the interest of the majority of the community.

## VIRGINIA PARK TOWNES

### **DETAILED SCOPE OF WORK**

#### **Site**

- Construction of a new two attached duplexes total 4-units, 7,140 gsf
- Construction of a new five attached duplexes total 15-units, 17,850 gsf
- New vehicular drive and entry off third avenue
- New car port for 4 cars (14 cars in attached garages)
- New dumpster enclosure and site landscaping

#### **Building**

- Wood framed three story structures, two buildings total 14-units
- Membrane roof pitch to rear to gutters and downspouts
- Roof parapets on three sides of building to screen view of AC units
- Front entry stoop with brick walls and concrete cap, metal guard and handrail
- Front entry stoop will be cover with supporting columns and roof
- Attached 7-two car garages, each with a 16' wide garage doors
- Partial brick façade with concave mortar joints
- Partial fiber cement panels, painted with metal trim
- Aluminum clad wood windows
- Metal front entry and sectional overhead garage doors.
- Metal suspended balcony with tension rods at rear bedrooms second and third floor

## VIRGINIA PARK TOWNES

### **Review of Elements of Design**

1. Height: Six of the adjoining structures on the same face shall be used to determine an average height. With the height of the two adjoining houses shall be added into the total twice. Any new building must have a height of the main roof of at least 80 percent of the resulting average; in no case shall a new building be taller than the tallest roof height.

Average height of 6 Virginia Park homes

830 42.66' x2

850 29.37 x2

866 39.37'

874 36.09

888 39.37'

918 32.81'

291.7 subtotal divided by 8 = 36.46' resulting average roof height.

The resulting average minimum roof height 36.46' < 34.16' proposed roof height OK

The maximum roof height is 42.66' > 34.16' proposed roof height OK

2. Proportion of the buildings' front facades: "..... row house buildings are wider than tall; apartment buildings appear taller than wide although some are wider than tall due to projecting and receding wall surface that emphasize the vertical." The proposed building design has bays that create that create a projecting and receding façade. The façade has a vertical expression with the following elements; bays extending past the roof parapet, brick wall and vertical windows.

3. Proportion of openings within the facades: "Areas of voids generally constitute between 15 percent and 35 percent of the front façade, excluding the roof" The proposed design front elevation has 28 percentage, within the range required. The windows are generally taller than wide, but are frequently grouped into combination wider than tall.

4. Rhythm of solids to voids in front facades: The proposed facades arrangement of openings are balanced composition and symmetrical.

5. Rhythm of spacing of building on streets: The building facing Virginia Park Ave. takes up most of the frontage, but still leaves side yard setbacks. Including able separation of the existing single residential home to the west. The rhythm of the buildings facing Third Street is adequate to have a vehicular drive between the buildings and spacing with the existing townhouse to the north.

6. Rhythm of entrance and/or porch projections: The front stoop at each entry creates a rhythm in the façade and leads to a consistency of the streetscape.

7. Relationship of materials: There is a combination of brick and siding on the front and side elevations. The rear is all siding. Stone is used at sills of windows when brick is present. The front entry stoop roof trim and supports are painted wood.
8. Relationship of textures: The brick is a smooth brick with concave mortar joints that contrast nicely with the smooth painted fiber cement board.
9. Relationship of colors: The brick has natural brick colors similar to homes on the block. Natural limestone is used. The smooth beige panel siding is contrasted with the gray window frame and metal trim that divides the panel siding. The front door, canopies and balconies are also in a gray color.
10. Relationship of architectural details: The contemporary building design has architectural details used in the front entry stoop. Neighboring existing entry stoop details were used in the design. Both gable and flat roof coverings with supporting columns and brackets are used.
11. Relationship of roof shapes: The majority of the structure has a flat roof. The front entry stoops do have roofs similar to neighboring homes. Gabled and flat entry roofs are shown.
12. Walls of continuity: The front yard setback on Virginia Park Ave. does set forward of the adjacent home. But does have the approximate front yard setback of the city's design for the townhouses across the street. The front yard setback on Third Ave. matches the townhouses to the north across the alley. We are keeping the existing trees and adding additional trees to maintain the minor wall of continuity.
13. Relationship of significant landscaping features and surface treatments: The development is retaining all the existing street trees and adding additional trees where there are none. There will be additional trees along Virginia Park Ave. sidewalk in the front yard setback. Hedges and shrubs will also be planted in the front yard closer to the building, each creating a linear planting.
14. Relationship of open space to structures: Currently there is a large open space across the street on Virginia Park Ave. The vacant lot formerly had the Detroit Hope Hospital on it.
15. Scale of facades and façade elements: The buildings have a moderate scale facades with small scaled elements.
16. Directional expression of front elevations: The Virginia Park Ave. building directional expressed as wider than tall, but has a vertical expression with its design elements. The Third Ave. building directional expression is certainly taller than wide.
17. Rhythm of building setbacks: See item 12.

18. Relationship of lot coverage: The proposed buildings have a lot coverage of 50%, is on the low end of the 50 -90% for the district's multi-family buildings.
19. Degree of complexity within the façade: The front facades are simple and less complex in keeping to the contemporary design style.
20. Orientation, vistas, overviews: The buildings are oriented to the south and to the east. The garages and exterior parking spaces are oriented away from the street view. The units take advantage of the dramatic view of the Fisher building, especially the units facing south.
21. Symmetric or asymmetric appearance: The front facades are symmetrical.
22. General environmental character: The character is strengthening by developing this vacant lot with urban, moderate density housing.

## **Exterior Building Materials and Colors**

Color palette of exterior materials and colors

1. Brick with concave gray mortar joints
2. Fiber cement panels
3. Metal trim at fiber cement panels
4. Front entry metal guard and handrail
5. Aluminum gutters and downspouts
6. Windows: Pella Lifestyle Series wood /aluminum clad  
color: Wolf Gray
7. Front entry doors: hollow metal with windows
8. Aluminum sectional garage door with windows: 16' wide x  
8' high
9. Rear bedroom metal suspended balcony with tension rods

## **Exterior Site Materials**

- A. Front entry light, wall mounted
- B. Front entry lighted address plate
- C. Area light above garages and on façade along the alley
- D. Metal car port

## Bay Panel Colors

## Specification Sheet

**02**

DIVISION: 07 00 00 THERMAL AND MOISTURE PROTECTION

I

SECTION: 07 46 46 FIBER CEMENT SIDING

**HARDIE® PANEL VERTICAL SIDING****Manufacturer**

James Hardie Building Products Inc.

The products are manufactured at the following locations, with quality control inspections by ICC-ES:

- Cleburne, Texas
- Plant City, Florida
- Reno, Nevada
- Waxahachie, Texas
- Prattville, Alabama
- Peru, Illinois
- Pulaski, Virginia
- Tacoma, Washington
- Fontana, California
- Summerville, South Carolina

**Compliance with the following codes**

- 2006 thru 2021 International Building Code (IBC)
- 2006 thru 2021 International Residential Code (IRC)

For more information about other compliances and applicable uses, refer to the ESR-1844

**Features**

- Noncombustible
- Dimensionally Stable
- Resistant to damage caused by pests
- Weather Resistant-Engineered for Climate®
- Impact resistant
- Sustainable

**Use**

James Hardie fiber-cement panels are used as exterior wall covering. The product complies with IBC Section 1403.9 and IRC Section R703.10. The product may be used on exterior walls of buildings of Type I, II, III and IV construction (IBC).

**Description**

Hardie® Panel vertical siding is a single-faced, cellulose fiber-reinforced cement (fiber-cement) product. Hardie® Panel vertical siding complies with ASTM C1186, as Grade II, Type A; has a flame-spread index of 0 and a smoke-developed index of 5 when tested in accordance with ASTM E84; and is classified as noncombustible when tested in accordance with ASTM E136.

**Available Sizes**

Product	Width (inches)	Length (feet)	Thickness (inches)
Hardie® Panel vertical siding	48	8, 9*, 10	5/16

\* Size not available in ColorPlus® Technology, primed only.

Weight: 2.40 lbs. per square foot

**Texture & Finish**

Hardie® Panel vertical siding comes in a variety of textures and finishes. The product is available in smooth, wood grain, Sierra 8, or stucco. Finish options are primed for field paint, or factory finished with ColorPlus® Technology. Color availability varies by region.

**Engineered for Climate®**

Hardie® Panel vertical siding is engineered for performance to specific weather conditions by climate zones as identified by the following map.

Performance Properties

General Property		Test Method	Unit or Characteristic	Requirement	Result
PHYSICAL ATTRIBUTES	Dimensional Tolerances	ASTM C1185	Length	± 0.5% or ± 1/4 in	Pass

Note 1: listed on Warnock Hersey and ESR 1844

Installation

Install Hardie® Panel vertical siding in accordance with:

- Hardie® Panel vertical siding installation instructions
- ICC-ES ESR-1844
- Requirements of authorities having jurisdiction

Warranty

Hardie® Panel vertical siding: 30-year, Non-Prorated, Limited Warranty  
ColorPlus® Technology: 15-year Limited Finish Warranty

Sustainable Design Contribution

- Regionally sourced content- varies by project location
- Avoidance of certain chemicals or Red List Compliance

Detailed product information for LEED projects, or other state or regional sustainability programs is available through James Hardie Technical Services.

Storage and Handling

Store flat and keep dry and covered prior to installation.

Technical Services

Contact James Hardie Technical Services online at JamesHardie.com, or by phone at (800)426-4051

**IMPORTANT:** Failure to install and finish this product in accordance with applicable building codes and James Hardie written application instructions may affect system performance, violate local building codes, void the product-only warranty and lead to personal injury. **DESIGN ADVICE:** Any information or assistance provided by James Hardie in relation to specific projects must be approved by the relevant specialists engaged for the project eg. builder, architect or engineer. James Hardie will not be responsible in connection with any such information or assistance.

# THE EASY CHOICE

Bold Design. Superior Functionality.

EasyTrim Reveals® is a complete two-piece, exterior aluminum trim system compatible with the most popular lap, siding and panel options on the market. EasyTrim Reveals® is the go-to for both residential and commercial projects across North America.

- ➔ UV / Fade Resistant
- ➔ Full-Edge Protection
- ➔ Anti-Corrosive
- ➔ Maintenance Free
- ➔ Moisture Management
- ➔ No-Sharp Edges

## The Easiest Choice to Make

More than just a trim solution, EasyTrim Reveals® significantly reduces installation time and enhances the building's exterior performance, minimizing the need for ongoing maintenance. Our Fit and Finish™ system features overlapping trims that protect siding from moisture and harsh elements. This design not only preserves the aesthetics but also extends the life of your building exterior, making EasyTrim Reveals® the smart choice for long-lasting quality.

## Multiple Colors and Finishes to Choose from

Full selection of color options available on our website.

# 8" Aluminum Box Gutter

Home / 8" Box Gutter & Accessories / 8" Aluminum Box Gutter

\$6.50

Minimum order 20'. Our 8" x .040" Aluminum Box Gutter can be shipped in lengths of 6, 10, 15 and 19 feet. Gutter can also be shipped at 20 & 26 foot lengths, but is considered and rated as excessive length by freight companies. (6' maximum lengths shipped via UPS)

Available in low gloss white, almond, dark bronze, and royal brown (see Aluminum Color Chart below).

Price shown is **per foot**, please enter the **total number of feet needed** in the Quantity box. **IMPORTANT:** When you're checking out, you'll have the opportunity to specify the quantity of each length of gutter you need. You'll enter this info in the "Order Notes" box at checkout.

Gutter orders LONGER than 6' will be shipped via truck and subject to a MINIMUM shipping fee of \$150.00

One to five pieces of gutter can be sent UPS in 6' sections. UPS charges will run in the \$100 range. Please indicate in the "Order Notes" area at checkout whether you want a UPS or freight quote.

**Each gutter and downspout order is unique at Classic Gutter Systems. Once you've placed your order on this website, you'll be contacted within 48 hours with a complete, detailed quote including packaging and shipping costs.**

# 4" x .024 Aluminum Corrugated Round Downspout, Select Colors

Home / 4" Round Downspout / 4" x .024 Aluminum Corrugated Round Downspout, Select Colors

We recommend corrugated downspout for areas of the country that experience snow and ice. Corrugation allows for expansion in the event of ice build-up in the downspout, and also helps hide nicks and dents from daily exposure.

Note: Select Color corrugated aluminum downspout, shown here in Grecian Green, is priced the same per 10-foot length as our Standard Colors (see Aluminum Color Chart below).

Due to the machine setup required to produce Select Color Corrugated Downspout and Elbows, there is a \$100.00 up charge (one up charge per color, per order).

Downspout sections are available in 10' pre-cut lengths. Each box holds 60 ft. of 4" downspout. Don't forget to order additional downspout for elbow offsets and future repairs.

You will need to reduce the size of the opening on the elbows and downspout.

Downspout orders LONGER than 6' will be shipped via truck and subject to a MINIMUM shipping fee of \$150.00

One to three pieces of downspout can be sent UPS. The 10' downspout will be cut into 6' & 4' sections. UPS charges will run in the \$100 range. Please indicate in the "Order Notes" area at checkout whether you want a UPS or freight quote.

To order Corrugated Select Color Downspout, please call us at 269.665.2700.

# Pella® Lifestyle Series

Clad/Wood

7.

#1 performing wood window and patio door for the combination of energy, sound and value.<sup>1</sup>

Triple-pane casement

Dual-pane casement

- **Performance redefined**

You don't have to compromise on any aspect of performance. Available performance solutions offer an unbeatable combination of energy efficiency, sound control and value.<sup>1</sup>

- **ENERGY STAR® certified<sup>2</sup>**

Pella products offer energy-efficient options that will meet or exceed ENERGY STAR guidelines in all 50 states. Pella Lifestyle Series products with triple-pane glass have been awarded ENERGY STAR Most Efficient Mark in 2023.

- **Enhanced sound control**

Our patented, triple-pane design with Advanced Low-E glass allows for mixed glass thickness for enhanced sound dampening resulting in an average 52% noise reduction versus single-pane windows.<sup>3</sup>

- **Popular features and options**

Low-maintenance aluminum-clad exteriors. Factory prefinish with a choice of several paints and stains, or choose primed or unfinished. Several grille types and patterns and high-transparency screens are also available.

- **Intentional design for improved durability**

Intentional jamb/sill design helps seal the end grain of the wood and elevates it off the rough opening, reducing the potential for moisture.

- **Durable 3-way corner joint**

Three-way corner joints are made up of mortise-and-tenon, metal fasteners and commercial adhesive for added strength and durability.

- **Low-maintenance exteriors**

Aluminum-clad exteriors with EnduraClad® finish resists fading and chalking. It is applied in an overlapping fashion for exceptional protection.

- **Exclusive wood protection**

Pella's exclusive EnduraGuard® wood protection is applied after the pieces have been cut and milled, but prior to final assembly. It provides advanced protection against the effects of moisture, decay, stains from mold and mildew — as well as termite damage.

- **Best limited lifetime warranty<sup>4</sup>**

Pella Lifestyle Series products are covered by the best limited lifetime warranty in the industry for wood windows and patio doors.<sup>4</sup>

- **Testing beyond requirements**

At Pella, our products are tested beyond requirements to help ensure they have long-lasting performance and reduce call-backs for you.

Available in these window and patio door styles:<sup>5</sup>

Special shape windows also available.

<sup>1,2,3,4,5</sup> See back cover for disclosures.

For exceptional durability, Pella Reserve products are available with extruded aluminum-clad exteriors. Choose from a wide variety of exterior colors or create a custom color to match your design. Low-maintenance EnduraClad exterior finish provides long-lasting beauty. EnduraClad Plus is also available.

# Insulated Steel Garage Doors

**THERMACORE® COLLECTION - MODELS 5720, 5740 & 5760**

[VIEW FULL GALLERY](#)

Thermacore® Collection insulated steel doors are the ideal choice for premium construction and maximum thermal efficiency. This series of doors feature construction of steel-polyurethane-steel as well as between-section seals with thermal breaks to reduce air infiltration. With several panel designs to choose from, these doors offer design flexibility, durability and thermal efficiency that will help keep your home comfortable in cold or hot climates.

Thermacore® Collection premium insulated garage doors deliver maximum thermal efficiency and design flexibility.

Overview	Garage Door Designs	Colors	Windows & Hardware	Documents
----------	---------------------	--------	--------------------	-----------

## Construction

### Product Specifications

5 Panel Options Available	Standard, Flush, Long, Microgroove, Vertical Short and Vertical Long
Thermacore® Construction	Provides a continuous layer of foamed-in-place, CFC-free polyurethane door insulation sandwiched between two layers of corrosion-resistant steel for maximum thermal efficiency
Polyurethane Garage Door Insulation	Provides thermal efficiency U-factor* of .20 (9.31 R-value**): Model 5720 U-factor* of .15 (12.76 R-value**): Model 5740 U-factor* of .10 (17.5 R-value**): Model 5760
Multiple Surface Options	Embossed wood grain, microgroove wave pattern and smooth
Steel Backing	For clean, finished interior appearance
Durable Finish	Hot-dipped galvanized steel with two coats of baked-on polyester

## Product Specifications

### In-between Section Seals

Seals provide superior resistance to the elements

### Bulb-type Bottom Weatherseal

Guards against wind and rain while providing a cushion when closing

### Wind Load

Our WindStorm™ wind load rated system is available on selected products and meets all applicable building regulations for a variety of wind speeds, ensuring your door is built to withstand varying wind conditions, including hurricane-force winds, and meet or exceed the most stringent local building codes.

*\*U-factor values are independently tested and verified per ANSI/DASMA 105.*

*\*\*Overhead Door™ Brand uses a calculated door section R-value for our insulated doors.*

Overhead Door™ Brand participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of sectional doors. The lower the U-factor rating, the better the thermal performance.

*Symbol indicates verified U-factor rating in accordance with the DASMA Thermal Performance Verification Program.*

## Warranty

- 20-year limited warranty on Models 5720
- Limited lifetime warranty on door Models 5740 and Model 5760

## Residential garage door and opener system limited warranty

- (when purchased together) - features 3 year on components (see warranty for details)

Thermacore® Collection premium insulated garage doors deliver maximum thermal efficiency and design flexibility.

## Standard Balconies

We fabricate our standard alumiLAST® balconies using aluminum tube construction. We can combine these balconies with our aluminum decking or composite decking. These balconies feature welded aluminum railing supports with a variety of panels, and we deliver it to your site with the decking already installed and the railing and panels or pickets cut to fit and ready for easy installation.

These all-aluminum balconies usually attach to the building with lag bolts and threaded rods. However, alternative designs such as cantilevering, bolt-on or attaching with only knifeplates are possible. We match the attachment technique to meet your plan requirements.

Building Products

## alumiLAST® Decking General Information

### PRODUCT DESCRIPTION

Endurable Building Products, the manufacturer of alumiLAST® deck and balcony frames, introduces alumiLAST® Decking, a line of powder coated aluminum decking. alumiLAST® decking features interlocking boards designed to be virtually watertight, and with the addition of a custom gasket, the boards can be completely watertight. Custom engineered starter strips and edge trim pieces are also available.

### alumiLAST® DECKING FEATURES AND BENEFITS

Non-slip textured powder coat finish.

- Light weight. Boards weigh approximately 1 pound per foot.
- Low maintenance. Boards will not crack or split.
- Non-combustible. Aluminum will not burn.
- Five standard colors: Bronze, Black, Light Gray, Storm Gray & Wheat  
*(Custom colors also available).*
- Limited Lifetime Warranty.
- 5 year powder coat finish warranty.

## Z-1080 LED

Wall Mounted Vertical Only • Wet Location Listed

### Description:

Transform the mundane everyday with the sophisticated styling of this LED outdoor sconce. A smooth, elongated frame with a black finish dominates the design and exudes a modern attitude perfect for indoor or outdoor spaces. A beautiful, acrylic shade stretches into a rectangular form, held in place by simple metal bars at each end for a picture-perfect finish. Vertical mount only.

### Specifications:

- White acrylic Diffuser
- A beautiful, acrylic shade stretches into a rectangular form, held in place by simple metal bars at each end for a picture-perfect finish.
- A smooth, elongated frame with a black finish dominates the design and exudes a modern attitude perfect for indoor or outdoor spaces.
- Transform the mundane everyday with the sophisticated styling of this LED outdoor sconce.
- Ideal for any foyer, bedroom, entryway, porch, or patio.
- Perfect for transitional, modern, or contemporary settings.
- Measures 5-inch width by 13-inch height.
- Uses one integrated LED (11w max).
- Compatible with many Triac/ELV dimmers (see dimming controls)
- Includes installation instructions and mounting hardware.
- Progress Lighting products are designed for exceptional quality, reliability, and functionality.
- Dimmable to 10% brightness (See Dimming Notes)
- Canopy covers a standard 4" recessed outlet box: 4.75 in W., 12.5 in ht., 1.875 in depth
- Mounting backplate for outlet box included
- 6 in of wire supplied
- Americans With Disabilities Act (ADA) compliant

### Performance:

Number of Modules	1
Input Power	11 W
Input Voltage	120 V
Input Frequency	60 Hz
Lumens/LPW (Delivered)	415/37 (LM-79)
CCT	3000 K
CRI	90 CRI
Life (hours)	54000 (L70/TM-21)
EMI/RFI	FCC Title 47, Part 15, Class B
Warranty	5-year Limited Warranty
Labels	cCSAus Wet Location Listed
	ENERGY STAR® qualified
	Meets California Title 24 JA8-2016

#### Dimming Notes:

P560210-031-30 is designed to be compatible with many Triac/ELV controls.

The following is a partial list of known compatible dimmer controls.

#### Dimming Controls:

Leviton IPI06-1LZ

Leviton 6674

Lutron NTEVL-300

Lutron DVELV-300P

Lutron AYCL-153P

Dimming capabilities will vary depending on the dimmer control, load, and circuit installation.

Always refer to dimmer manufacturer instructions or a controls specialist for specific requirements.

Dimmer control brand names where identified above are trade names or registered trademarks of each respective company.

Details

Make your home safer, more secure, and welcoming by providing your guests with an illuminated address light. Create an inviting entrance and make it easier for deliveries, our LED address light is available in your choice of Black, Bronze, or White with number tiles sold separately.

Features:

- For use with Maxim address numbers (not included)
- Durable aluminum construction
- ADA and Title 24 compliant
- Dark Sky approved
- cETLus rated for wet locations
- Covered under Maxim's 5 year manufacturer warranty

Dimensions:

- Height: 7"
- Width: 12-1/2"
- Extension: 2-1/4"
- Product Weight: 1.21 lbs
- Wire Length: 6"

Electrical Specifications:

- Wattage: 3W
- Lumens: 160
- Color Temperature: 3000K
- Color Rendering Index (CRI): 80
- Average Hours: 25000

## PREMIER STEEL 4-CAR CARPORT/GAZEBO

The ChikoUSA Premier Steel 4-Car Carport / Gazebo is the most cost effective solar canopy solution in the market today! This elegant structure is designed with a beam and column configuration resulting in superior strength. Ease and speed of install are two important design benefits. This structure can accommodate a variety of panel sizes and configurations. The steel coating of Zinc-Aluminum-Magnesium (Zn-Al-Mg) or ZAM provides the best In class protection while delivering superior corrosion resistance.

### PRODUCT LINE

Item	Product Name
CK-QLCP-STEEL	Premier Steel 4-Car Carport/Gazebo

### TECHNICAL DATA

Main Material	: S350 Steel Zinc Aluminum Magnesium (Zn-Al-Mg) Coated
Wind Velocity	: Up to 115MPH
Snow Load	: Up to 15 PSF
Tilt angle	: 5 Degrees
Module Orientation	: Landscape & Portrait
Foundation	: 3 Footer Options
Waterproof	: Optional
Module Type	: 60, 72 Cell & Large Format

### ADVANTAGES

- Beautiful
- Easy installation
- Zinc Aluminum Magnesium (Zn-Al-Mg) Coated
- Anti-corrosion and anti-rust
