## BRIEF PROJECT DESCRIPTION:

Renovation of unapproved roof, and installation siding and stucco and efs modification

## APPLICANT IDENTIFICATION

**TYPE OF APPLICANT:** Architect/Engineer/Consultant

**NAME:** Timothy Flintoff Jr.

**COMPANY NAME:** 4545 Architecture

**ADDRESS:** 2761 E. Jefferson Ave, Ste 302

**CITY:** Detroit

**STATE:** MI

**ZIP:** 48207

**PHONE:** +1 (313) 450-4545

**EMAIL:** tim.flintoff@4545architecture.com

## I AGREE TO AND AFFIRM THE FOLLOWING:

- ☒ I understand that the failure to upload all required documentation may result in extended review times for my project and/or a denied application.
- ☒ I understand that the review of this application by the Historic District Commission does not waive my responsibility to comply with any other applicable ordinances including obtaining appropriate permits (building, sign, etc.) or other department approvals prior to beginning the work.
- ☒ I hereby certify that the information on this application is true and correct. I certify that the proposed work is authorized by the owner of record and I have been authorized to make this application as the property owner(s) authorized agent.

PROJECT DETAILS – TELL US ABOUT YOUR PROJECT

Instructions: Add project details using the text box in each section. If your details exceed the space provided, attach the details via the attachment icon for that section.

ePLANS PERMIT NUMBER: (only applicable if you've already applied for permits through ePLANS)	N/A
---	-----

GENERAL

<b>1. DESCRIPTION OF EXISTING CONDITION</b> <i>Please tell us about the current appearance and conditions of the areas you want to change. You may use a few sentences or attach a separate prepared document on the right. (For example, "existing roof on my garage is covered in gray asphalt shingles in poor condition.")</i>	
<b>2. PHOTOGRAPHS</b> <i>Help us understand your project. Please attach photographs of all areas where work is proposed.</i>	
<b>3. DESCRIPTION OF PROJECT</b> <i>In this box, tell us about what you want to do at the areas described above in box #1. (For example, Install new asphalt shingle roofing at garage.)</i>	
	
<b>4. DETAILED SCOPE OF WORK</b> <i>In this box, please describe all steps necessary to complete the work described in box #3. (For example, "remove existing shingles, replace wood deck as necessary, replace wood eaves, install roof vents, replace rotted fascia boards, paint, clean worksite.")</i>	
	
<b>5. BROCHURES/CUT SHEETS</b> <i>Please provide information on the products or materials you are proposing to install. For example, a brochure on the brand and color of the shingles proposed.</i>	

ADDITIONAL DETAILS

<div>6. WINDOWS/DOORS</div> <div>Detailed photographs of window(s) and/or door(s) proposed for replacement showing the condition of the interior and exterior of the window(s) and/or door(s)</div>	
<div>9. OTHER</div> <div>Please provide any additional details. HDC Staff may ask you to submit additional information at a later time depending on your project.</div>

April 21, 2025

1624 Edison St.,  
Detroit, MI 48206

RE: 1624 Edison St. Historic District Commission Submission

### Project Narrative

1624 Edison St. is a 2.5 story single-family residence in the Boston Edison Historic District of Detroit, built in the early 1900s. It is located near the intersection of Edison St. and Woodrow Wilson St. It features a side-gabled main roof with a front-facing gabled entry and dormer. It is primarily clad in a combination of a synthetic stucco/exterior insulation and finish system (EIFS) and a fiber cement lap siding with a faux wood grain finish. The front porch is covered by the front-facing gabled roof, which is offset from the center of the south/front elevation. It features (2) stucco-clad columns. At the opposite side of the front entry is a 2-story protruding bay window. At the rear is a 1-story hipped-roof wing clad on three sides with the fiber cement lap siding. The west side facade has a stucco-clad chimney and a protruding window bay at the first floor. Another window bay is present at the rear/first floor. At the east side there is a similar window bay at the second floor.

The stucco/EIFS is to be removed from the bottom 2'-0" of each facade, and replaced with a stucco/DensGlass system, with the goal of avoiding future moisture intrusion problems that are common with EIFS. Flashing will be added between the EIFS and DensGlass systems. Further, all stucco/EIFS present at the building's second story (from 9'-6" above grade and beyond) will be removed. A Hardie brand composite lap siding with a smooth finish will be installed as the primary cladding for the second story. All instances where there is currently fiber cement siding with a faux wood grain finish will be replaced with this Hardie smooth-finish lap siding (i.e. the front facing gable, front dormer face, front 2nd floor, and the rear wing). The two protruding window bays at the first floor of the east and north facades will be primarily clad with the Hardie lap siding, with the windows to be trimmed with a painted wood; A similar look will be present at the 2-story bay window at the front. All other windows at the 2nd story will have a Hardie smooth-finish composite frame surround. At the first floor where the stucco/EIFS remains, there are aesthetic 'grooves' on the surface, which will be filed and infilled to create a smooth finish. The stucco/EIFS will be removed from the chimney and porch walls, and a parge coat will be applied to them. The two stucco-clad columns at the front porch will be removed and replaced with painted wood columns that are more historically appropriate. A third column was originally present, and will be replaced with the same.

Three new steel entry doors have been installed at the front, side, and rear entries. Black double-hung aluminum-clad wood windows have been installed; there is currently (1) missing window, which will be replaced with the same style of double-hung aluminum-clad wood window.

There is an approximately 20'x20' garage with a hipped roof at the rear of the property, abutting the alley. It has been clad with stucco/EIFS. As with the main house, the bottom 2'-0" will be removed and replaced with a stucco/DensGlass system.

April 16, 2025

1624 Edison St.,  
Detroit, MI 48206

RE: 1624 Edison St. Historic District Commission Submission

### Scope of Work

1. Remove stucco/exterior insulation and finish system (EIFS) from bottom 2'-0" of all facades
  - a. Replace with stucco on DensGlass sheathing, furred out to existing stucco plane (see architectural detail drawing)
2. Remove stucco/EIFS from 2nd story of all facades, approximately 9'-6" above grade and up (to align with previously existing siding location)
  - a. Install Hardie composite lap siding in smooth finish in place
3. Replace existing composite siding (at rear hip roof wing, front gable face, front dormer face, and front 2nd floor) with Hardie composite lap siding in smooth finish
4. East and north elevation window bays to be clad with Hardie composite lap siding with smooth finish; windows to have painted wood framing
5. 2nd floor windows surrounded by composite lap siding to have 4" composite framing (white)
6. Remove stucco/EIFS from chimney and porch
  - a. Apply parge coat to chimney and porch
7. Remove (2) EIFS-clad columns at front porch
  - a. Replace with wood columns (painted white) that are historically appropriate
  - b. Replace missing middle column with wood column (white)
8. Add painted (white) wood cladding surround to 2nd floor windows at front window bay and front of 3rd story front-facing dormer, in place of current EIFS
9. Add (3) new steel entry doors (currently installed)
10. Add new wood stair with composite treads to match siding to rear entry door (installed)
11. All windows to be aluminum-clad wood, black (installed)
  - a. Replace (1) missing window at east elevation, 2nd floor; match existing windows
12. Repair garage exterior:
  - a. Remove stucco/exterior insulation and finish system (EIFS) from bottom 2'-0" of all facades
  - b. Replace with stucco on DensGlass sheathing, furred out to existing stucco plane (see architectural detail drawing)

# HardieZone® System

Only James Hardie® fiber cement products are Engineered for Climate®. In the northern U.S. and Canada, HZ5® products resist shrinking, swelling and cracking even after years of wet or freezing conditions. HZ10® products help protect homes from hot, humid conditions, blistering sun and more.

With James Hardie® siding and trim, homeowners have an exterior that's tougher than the elements and easy on the eyes.

Resist the elements  
**WITH IRRESISTIBLE BEAUTY.**

# Unique Formulation

## HZ5® Substrate

Not all fiber cement is the same. The James Hardie HZ5 product formulation contains the highest quality raw materials. Proprietary additives, combined with an innovative manufacturing process and product design, create a substrate specifically engineered to reduce moisture and resist damage from wet or freezing conditions.

### PROPRIETARY ENHANCEMENTS CREATE DURABLE JAMES HARDIE® SIDING

#### Perfect balance of strength and workability

Our balance of high-quality Portland cement, sand and cellulose fiber delivers the best combination of strength and workability.

#### Enhanced moisture resistance for unmatched durability

Patented and proprietary additives are chemically bonded within the HZ5® substrate matrix to provide durable moisture resistance.

#### Increased dimensional stability

Our siding is engineered at the microscopic level to create a fiber cement composite with superior dimensional stability that helps protect against shrinking and splitting.

MADE IN THE  
**USA**

Integrity is ingrained  
**IN EVERYTHING WE DO.**

HardiePlank®  
Lap Siding  
Evening Blue

**The advanced design of HZ5® lap siding improves drainage from top to bottom.**

In addition to the enhanced moisture resistance of our product formulation, HardiePlank® HZ5® lap siding features a modified profile with a sloped top and bullnose drip edge for improved drainage over the entire outer face of the board.

#### **Sloped Top**

Positive slope at top drains moisture to outer face of lap

#### **Profiled Drip Edge**

Bottom bullnose drip edge allows moisture to drain away from lap

# Finishing Technology

## Primer

A quality primer is the first step to ensuring that the paint color you select beautifully expresses a home's true character now — and for years to come. Our distinctive primer is climate-tested and engineered to enhance the performance of paint on James Hardie® fiber cement siding products. It helps to provide consistent, long-lasting paint adhesion, even in the most demanding conditions.

## ColorPlus® Technology

Our advanced ColorPlus® Technology finishes deliver the ultimate in aesthetics and performance. Our products aren't simply painted at the factory. Our proprietary coatings are baked onto the board, creating a vibrant, consistent finish that performs better, lasts longer and looks brighter on your homes.

### Exceptional finish adhesion

Our proprietary coating is engineered for exceptional adhesion to our substrate and applied to the surface, edges and features for durable performance.

### Superior color retention

Finish is cured onto boards for a stronger bond, which allows for exceptional resistance to cracking, peeling and chipping.

### Superior UV resistance

ColorPlus® Technology finishes retain vibrancy longer when compared to vinyl siding and typical field paints on other siding products.

**ColorPlus®**  
Technology

## Lasting beauty **BEGINS WITH THE FINISH.**

**Our finishes help eliminate stress and reduce costly weather delays** when it's too cold or damp to paint for extended periods. Now there's no reason to question whether or not sub-optimal painting conditions will negatively affect your paint job. In fact, there's no longer any need to paint on-site during installation.

ColorPlus® Technology finishes are fully cured in a controlled environment and arrive on your job site ready for year-round installation.

For complete confidence wrap your  
**ENTIRE EXTERIOR WITH JAMES HARDIE.**

## James Hardie Complete Exterior™

Top to bottom, our exterior product line is defined by excellent performance, aesthetics and design options.

Provide protection from the elements, showcase a homeowner's individual style and install peace of mind with exceptional warranties through a single, trusted manufacturer.

# HardieSoffit®

A home is only as strong as its weakest point. HardieSoffit® panels reinforce your work by protecting the vulnerable gap between eaves and exterior walls.

Available in vented, non-vented and a range of pre-cut sizes, these panels complete your design and help protect it from moisture and pests.

## VENTILATION BENEFITS

Using vented soffit improves ventilation in the attic space and reduces the chance of water vapor condensation that can lead to issues such as mold and mildew growth, stained ceilings and damage to the framing of the house.

In warm climates, HardieSoffit panels allow hot, humid air to escape, which not only helps prevent condensation in the attic, but can also help reduce air conditioning costs.

In cool climates, HardieSoffit panels help prevent condensation from forming on the interior side of the roof sheathing and reduce the chances of roof-damaging ice dams.

# Get Inspired

## CRISP & CLEAN

### LIGHT COLORS

Whites and soft pastels are pure, clean, new and bright. Combine with other hues to add interest, personality and contrast. Works well on houses with Colonial Inspiration. A pastel A-frame cottage can look sweet and charming.

Arctic White

Navajo Beige

Cobble Stone

## SUBTLE & SOPHISTICATED

### NEUTRAL COLORS

Neutral rules the suburbs. These shades are safe, but also sophisticated. When accessorized with black or a darker color, a neutral can look fashionably stylish. Play with textures and use different tones for trim.

Iron Gray

Evening Blue

Night Gray

## A BOLD CHOICE

### DARK COLORS

Dark grays, blues and greens can feel both intellectual and modern. When used with white trim, they create drama. Works well in old neighborhoods, or urban environments, where there is a mix of old and new.

## DREAM COLLECTION™

Looking to further express your sense of style? Look to our Dream Collection™ products.

- Featuring a color palette of over 700 ColorPlus® Technology finishes
- Made to order in a wide array of James Hardie® siding and trim styles
- Matches elevated design flexibility with the uncompromising performance of our fiber cement products

To see what's possible and order Dream Collection product samples visit [jameshardiepros.com/dream](https://jameshardiepros.com/dream)

Timber Bark

# HardieWrap®

No exterior cladding can prevent 100% of water intrusion. Your homes should have an additional line of defense. HardieWrap® weather barrier provides a superior balance of water resistance and breathability, keeping the area within the wall drier. This helps prevent moisture accumulation that may lead to mold and mildew growth.

## INSTALLATION ADVANTAGES

- Thicker, more durable material for easier, quicker installation
- Superior tear resistance helps prevent water infiltration
- Can be installed with staples in place of cap nails for cost savings
- Provides a higher level of performance, no matter what type of cladding you specify

We've got performance covered  
**FROM THE INSIDE OUT.**

### WEATHER BARRIER

Thickness	11 mil			
Length	100 ft	100 ft	150 ft	150 ft
Width	3 ft	9 ft	9 ft	10 ft

### PRO-FLASHING

Thickness	20 mil		
Length	75 ft	75 ft	75 ft
Width	4 in	6 in	9 in

### FLEX FLASHING

Thickness	60 mil	
Length	75 ft	75 ft
Width	6 in	9 in

### SEAM TAPE

Thickness	3.2 mil
Length	164 ft
Width	1-7/8 in

To learn more about our weather barrier's advantages, visit [jameshardiepros.com](http://jameshardiepros.com)

# Install Done Right

## Installation Accessories

### HARDIEBLADE® SAW BLADES

Manufactured by Diablo, the HardieBlade® saw blade is designed specifically to cut fiber cement products, and is the only saw blade James Hardie recommends. The blade creates clean, precise cuts while helping to reduce the amount of airborne dust produced. Specially designed to outlast other fiber cement saw blades by 3X, outlasting carbide blades by 60X.

### PACTOOL® GECKO GAUGE

The PacTool® Gecko Gauge is designed to improve the installation experience, allowing one person to hang HardiePlank® lap siding during installation. Studies suggest the Gecko Gauge can improve the speed of solo installation by 30%.

## Finishing Touches

### ColorPlus® Technology Accessories

#### TOUCH-UP KITS

Specially formulated to match ColorPlus Technology finishes, our touch-up kits offer resistance to aging, color change and chalking. Estimated one kit per 4000 sq ft of siding or 1600 sq ft of trim.

#### COLOR MATCHED CAULK

OSI® QUAD® MAX sealant offers a high performance sealant solution to color match Statement Collection™ products.\* About 18-20 linear feet per tube. Refer to packaging for manufacturer's recommendations.

*\*For matching Dream Collection products, contact your local James Hardie representative.*

## Trim Accessories

#### FLAT TABS

Eliminate face nails and improve the aesthetic of trim applications around windows, doors and band boards.

#### CORNER TABS

Use corner tabs to eliminate face nail holes that would detract from the finished look of corner trim installations.

Find useful job-site tips in our industry-leading Best Practices Guide. For the latest installation instructions, visit [jameshardiepros.com](https://www.jameshardiepros.com)

## See the James Hardie Difference

James Hardie invented fiber cement. Over 8 million homes\* later, we continue to set the standard in premium, high-performance exterior cladding. Our products deliver uncompromising durability and finish quality for a beautiful, lower maintenance exterior.

Our unrivaled investment in R&D and constant innovations in product design, manufacturing and distribution allow us to remain steps ahead of the competition. With the support of our employees, partners and exceptional warranties, we're committed to protecting your customers' homes while helping your business grow.

\*Estimate based on total James Hardie siding sales through 2016 and average housing unit size.

# Warranty – for peace of mind

Protect your homes with North America's #1 brand of siding backed by exceptional warranties. Unlike other brands, James Hardie doesn't prorate our siding and trim warranty coverage. We stand behind our siding 100% for 30 years and trim for 15 years.

ColorPlus® Technology finishes come with a 15-year limited warranty.

## James Hardie Non-Prorated Siding Substrate Warranty Coverage

# Endorsements – a reputation built on trust

For decades, our fiber cement products have been used to create better places to live. Each new home stands as a testament to our uncompromising quality. That proven track record has earned the loyalty of millions of homeowners and the endorsements of trusted authorities across the building industry.
