## REQUESTED INFORMATION

We have received your application, but it is not yet complete for review. Please provide additional details based on the comments and questions listed below. Should you need to attach additional files per this request, use the paperclip icons at the end of this form. You may attach up to (5) files per icon up to 25MB:

Thank you for the additional information. The commission will need to understand thoroughly what you are proposing. Could you please provide the below information by July 18? If the information you provide by that date is sufficient for the commission to fully understand the proposal, your agenda item should be able to be reviewed at the commission's August meeting.

It appears that you plan to replace 34 windows, plus the storefront. Please confirm or correct.

Before the commission can approve replacement windows, they need to understand the conditions of the existing windows. Please provide photos showing the conditions of each window proposed for replacement, including photos of both interior and exterior.

If the commission agrees that the windows are beyond repair, they will need to understand the replacements you propose.

--Does Pella make grilles in all of the configurations needed to replicate the different window types? Can you provide the measurements for the components (rails, stiles, muntins/grilles) of the proposed windows?

--Please share a window quote/estimate or draft order that shows the different windows you plan to order with the necessary grilles.

It would be ideal if you could indicate which proposed windows on the order are which window types on your window schedule.

For the storefront, can you please indicate specifically which Tubelite entrance door and which storefront series you plan to use?

Please also indicate if stained glass will be inserted into the storefront where it is currently.

Thank you very much.

## APPLICANT RESPONSE

Response Date: 07/17/2025

The number of windows to be replaced is 42 plus the storefront.

Attached is as many images as I could get of the windows and storefront. Client is currently out of the country.

Attached is the Pella draft estimate.

Attached is the Tubelite cut sheet with selections noted. The color panels in the storefront are currently a combination of plexiglass, window film, and non-glass spandrel material.

## WHY CHOOSE WOOD?

Get the beauty and warmth of natural wood, our most customizable designs and exceptional energy efficiency. All Pella wood products are made with high-quality wood, metal and manufacturing processes, regardless of product line.

### EXCLUSIVE WOOD PROTECTION

Pella’s exclusive EnduraGuard® wood protection is applied after the pieces have been cut and milled, but prior to final assembly, providing advanced protection against the elements.

### DESIGNED FOR LONG-LASTING DURABILITY

Intentional jamb-on-sill design helps seal the end grain of the wood and elevates it off the rough opening, reducing the potential to absorb moisture. For added strength and durability, our three-way corner joints are made up of mortise-and-tenon, metal fasteners and commercial adhesive.

### QUALITY EXTERIOR AND INTERIOR FINISHES

Extruded aluminum-clad exteriors feature through-stile construction for exceptional durability and EnduraClad® finishes that resist fading and chalking. Interiors can be factory pre-finished to save time. Our prefinish is applied prior to final assembly and kiln-cured for a quality aesthetic.

## THE BEST LIMITED LIFETIME WARRANTY FOR WOOD WINDOWS AND PATIO DOORS\*

You can be confident in your investment. At Pella, we are committed to designing and building wood products with exceptional quality and durability. This is supported by:

**ENDURAGUARD® WOOD PROTECTION**  
Advanced protection for wood against the effects of moisture, decay, stains from mold and mildew — as well as termite damage.

**EXTERIOR ALUMINUM CLADDING**  
Exceptionally durable aluminum cladding with EnduraClad® exterior finish helps protect windows and patio doors for years.

**INSULATING GLASS SEAL**  
A long-lasting insulating glass seal provides a clear view and exceptional energy efficiency.

## Durable Tie-Rod Construction

The strength and flexibility of steel tie-rod construction is what holds it all together and makes our doors endure. No other door offers you this much strength and flexibility.

## 14000 I/O Series

Glass or panels can be positioned to the inboard (I) or outboard (O) side of the 4-1/2" depth frame to achieve the look you imagine. Typical glass thickness is 1", and can be installed from the outside or inside of the building. Special glazing pocket reducers allow the use of 1/4" infill thicknesses, too.

14000 I/O Series Multiplane Storefront Framing thermal barrier insulates exterior surfaces from the interior to minimize temperature transfer. This provides industry accepted performance for condensation resistance and energy performance.

Using the same design, assembly, and accessories as the 14000 center glazed system allows combining inboard, outboard and center planes of glass in the same elevation with the same great performance.

14000 I/O Series Storefront; Project: Sandy Commerce Par; Sandy, UT; Architect: Babcock Design; General Contractor: Jacobsen Construction

## T24650/E24650 Series

A new look for a timeless design. T24650 Series Storefront Framing has the same design, assembly and accessories as the 14000 center glazed system's 2" face with a 6-1/2" depth. This additional 2" depth on the interior side of the frame provides greater structural properties and allows taller first floor openings. The wider profile also cuts a distinctive image for a storefront that stands out from the crowd.

T24650 Series provides industry-accepted performance for CRF (condensation resistance) and U<sub>c</sub> (conduction), using the same thermal barrier as the 14000 and 14000 I/O systems.

### Product Performance Information:

U-Factor, Solar Heat Gain Coefficient (SHGC), and Visible Light Transmittance (VLT) are certified by the National Fenestration Rating Council (NFRC).

Manufacturer stipulates that these ratings conform to applicable NFRC procedures for determining whole product performance. NFRC ratings are determined for a fixed set of environmental conditions and a specific product size. NFRC does not recommend any products and does not warrant the suitability of any product for any specific use.

Design Pressure (DP), Performance Class, and Performance Grade (PG) are certified by a third party organization, in many cases the Window and Door Manufacturers Association (WDMA). The certification requires the performance of at least one product of the product line to be tested in accordance with the applicable performance standards and verified by an independent party. The certification indicates that the product(s) of the product line passed the applicable tests. The certification does not apply to mulled and/or product combinations unless noted. Actual product results will vary and change over the products life.

For more performance information along with information on Florida Product Approval System (FPAS) Number and Texas Dept. of Insurance (TDI) number go to [www.pella.com/performance](http://www.pella.com/performance).

Including during the construction period, casement windows should never be left open and unlocked for prolong periods or during high wind conditions to avoid sash detachment/damage.

Actual sizes tested for documented STC and OITC ratings may vary from the ASTM E 1425 sizes to better represent Pella product offering.

STC and OITC ratings shown may be conservatively based on products tested with thinner panes of glass.

STC and OITC ratings may be from test results from an equivalent product.
